

My Air, My Health Survey

1. Are you currently working on a proposal for this challenge? (Y/N)
 1. N -> If not, why not? (challenge sponsor request is too difficult; Challenge sponsors offering insufficient award; Challenge sponsors giving insufficient time for submissions; Other - Free Text)
 2. Y -> Are the challenge sponsors providing sufficient resources/directions to help you meet the most difficult aspects of the challenge? If not, what additional resources would help you better formulate your proposal (Free Text)
2. If you are working on a proposal, are you doing so on your own or with a team? (Team -> How many people are on your team, and are the challenge sponsors providing sufficient resources to support a team of this size? / Solo -> Could you use help from the challenge sponsors in finding additional experts to consult in putting together your proposal?)
3. If selected as a Phase 1 finalist, do you feel that the challenge sponsors have provided appropriate resources and directions to best formulate your Phase 2 proposal? If not, what additional resources are needed?(Y / N-> Free text)

Phase 1 finalists continuing with Phase 2 are expected to attend (or for a team, send representatives to attend) a workshop in Durham, NC on December 6th, 2012. The workshop is intended to provide resources and information to support you in developing your sensor systems beyond the end of the challenge, as well as to support the development of Phase 2 projects. Up to \$1000 in travel expenses will be covered for each finalist team.

4. Are challenge sponsors providing sufficient resources and information to make it easy for you to attend the workshop? If not, what additional resources or information would be helpful? (Y / N->Free text)
5. At the workshop, we are planning to include a session in which finalists will present their projects and receive feedback. In order for us to make this session most useful to you, we are asking for input on content. What information about your proposal would you be willing to share with the judging panel and fellow finalists at the workshop? What information would you be interested in hearing about your fellow finalists' projects? Is there any information that you would prefer not to share?(Free text)
6. At the workshop, the challenge sponsors plan to offer presentations and panels on a number of topics related to developing sensor systems and bringing them to market. Please rank your interest in the following topics from 1 to 10, with **1** representing the greatest interest in learning about a topic at the workshop:
 - _____ Potential funders for commercializing sensor systems
 - _____ Commercial production considerations
 - _____ Legal issues (Intellectual property)
 - _____ Legal issues (meeting regulatory requirements)
 - _____ Lessons from successful health/environment technology startups
 - _____ Potential markets for sensor systems

_____ Customer engagement and device usability

_____ “Innovation Intensive” interactive activity, focused on refining products based on customer feedback
