Picturing Your Program: An Introduction to Logic Modeling is a web-based online training course developed by the United States Environmental Protection Agency's Evaluation Support Division (ESD). ESD is located in the Office of Policy's Office of Strategic Environmental Management (OSEM). The online course was designed to provide users with practical instruction and the basic steps needed to develop a logic model. After completing the logic modeling course, ESD hopes that users will: 1) have the necessary information and skills to develop a logic model for their program or project, 2) understand how a logic model can be used in preparation for developing meaningful performance measures and conducting program evaluations. To improve our online training course to best meet your needs, ESD needs your feedback. Please help us by using about 5 minutes of your time to tell us what you think about the course. Thank you for giving us the opportunity to serve you better.
