PLACEMENT OF PULLET CHICKS FOR HATCHERY SUPPLY FLOCKS

[Close window](#)

According to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB control number. The valid OMB control number is 0535-0004. Approval Expires 07/31/2009. The time required to complete this information collection is estimated to average 12 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

PLACEMENT OF PULLET CHICKS FOR HATCHERY SUPPLY FLOCKS

Hatchery supply flocks are layers producing fertile eggs which could potentially be set in an incubator. Each month we ask the number of pullets hatched with the intended future placement in a hatchery supply flock. These pullets could be sold, or kept for your own flocks.
