INTRODUCTION
[Introduce yourself, and ask for the operator. Rephrase in your own words.]

The National Agricultural Statistics Service is collecting information on land management and conservation practices. The information collected will be used by the Natural Resources Conservation Service (NRCS) to assess the environmental benefits associated with the implementation and installation of conservation practices.

We need your help to make the information as accurate as possible. As conservation practices that are in place should be reported-whether they were installed as part of a Federal or State Cost-Share program, an industry or non-profit program, or by you (the operator) with no outside support. We encourage you to refer to your farm records during the interview.

Authority for collection on information on the Conservation Effects Assessment Project Report is under Title 7 of the U.S. Code and CIPSEA (Public Law 107-347. Response to this survey is confidential. Response to this survey is **voluntary**. You may skip any question(s) you prefer not to answer.

SCREENING

Determine the Area of Interest

To focus the respondent on the area of interest, the location must be identified as follows.

1. Selected field

- For purposes of this survey, the actual field where the sample point is located must be identified. This location is referred to as the selected field.
The survey collects information about conservation practices, cropping history and management practices being undertaken in the selected field.

2. Conservation practices associated with the field.

- Sometimes conservation practices are not actually located in the selected field but are adjacent to or adjoining the field (such as a wind break or filter strip). These practices should be captured during the survey also.
For CEAP purposes, this area is referred to as the conservation area.

During this interview, the questions will be about the SELECTED FIELD and/or the associated CONSERVATION AREA.

SCREENING – NO SIGNAL AVAILABLE

ENUMERATOR NOTE: [Show the aerial photography to respondent and locate the sample point. Identify the field associated with the point.]

1. Did you make any of the day-to-day farming/ranching decisions for the field containing this point in 2011?

- YES - [If Yes continue.]
NO - [If No, conclude the interview and ask for the respondent's assistance in locating the correct operator.]

ENUMERATOR NOTE: [With the respondent, draw off the entire area that can be identified as the selected field and associated conservation area.]

2. During 2011, was the entire field enrolled in the General or Continuous Conservation Reserve Program (CRP), the Conservation Reserve Enhancement Program (CREP), or any other type of continuous cover conservation program offered by State, local or non-profit organizations?

CODE
YES - [Enter 1.] NO - [Enter 3.]

3. In 2011, was any part of this field:

idle cropland; or
summer fallow
CODE
YES - [Enter 1, then go to item 5.] NO - [Enter 3, then go to item 4.]

FIELD OPERATIONS---SELECTED FIELD

1. Including custom operations, I need to list field work performed by machines on this field for the 2011, 2010 and 2009 crop years.

- Begin with the first field operation for the 2011 crop (after harvesting of 2010 crop.)
- List the operations in order by crop year, through harvest.
- Maintain the order of tandem hook-ups.

a. Let's start with the 2011 crops.
