

# NAHMS Swine 2012 Saliva Collection Record

Select 10 pens on the operation and tie 2 ropes into each pen.

The ropes must hang to within 6 inches of the ground. Pigs will investigate by chewing on the rope.

Remove the rope between 5 and 7 days.

Now what do they do?

Ship to lab along with the copy of this form within 24 hours of collection.

Send white copy to your Coordinator within 3 business days.

**Additional information regarding blood collection is described in the Field Handbook.**
