

# NAHMS Swine 2011 Nasal Swab Collection Record

Sample 35 LATE finisher pigs (20 weeks and older) collecting from a variety of pens containing the age-appropriate pigs.

**----- Please do not collect samples from any other swine such as sows, boars or piglets -----**

**Samples can be taken from all participating sites.**

-  Record site information, kit number, date, etc. on the following Nasal Swab Collection Record.
  -  For each animal, use one nasal swab provided. Insert the same swab into each nostril and twirl.
  -  Place swab in individual zip lock bag provided.
  -  Place label on zip lock bag and record facility, pen, animal (swab number) information on the right line on the label for each sample.
  -  Cool samples ASAP after clotting.
  -  Ship to NVSL on ice along with the copy of this form within 24 hours of collection.
  -  Send white copy to your Coordinator within 3 business days.
- 

 **Additional information regarding nasal swab collection is described in the Field Handbook.**

According to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0579-0315. The time required to complete this information collection is estimated to average 2 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.
