Invitation to Participate and legal permission

Dear Individual (specific name),

We are requesting your participation in a project to help us understand how people think about and make decisions about their finances. Our final goal is to design messages to encourage Americans to use core financial competencies for financial planning. Many financial problems can be prevented by early planning including saving and investing for retirement, tracking spending and minimizing borrowing, understanding earnings, and protecting financial assets from fraud. Although most of us are aware of the advantages of financial planning, many factors prevent us from assessing our financial risks. Very little is known about what kind of approaches would be helpful to support people in making them aware of the core financial capabilities and helping them take advantage of employer offered financial services. In this project we are evaluating several approaches to identify the most effective method to communicate the core financial competencies.

In the first phase of the project we will meet with 1	0 1
participants will assist us in understanding how peop	
capabilities. We hope you will be able to participate	
hour of your time. The meeting will be held at the _	
and lunch/snacks will be provided. We will pay you \$75 for your participation.	
You are not required to learn any information prianswers; we are mainly interested in what you thin about what you know and your beliefs and attitude and general information on factors that enhance or downwell document your ideas and comments both in will be linked with any responses. We will not use	nk. A moderator will ask general questions is towards financial readiness and planning, eter interest in assessing financial risk. In writing and by tape recording. No names
written or oral communications.	any personal rachimatic information in any
