

Request for Approval under the “Generic Clearance for the Collection of Routine Customer Feedback” (OMB Control Number: 2900-0770)

TITLE OF INFORMATION COLLECTION:

Survey of Veterans Perceptions of an Enhanced VA Outpatient Prescription Label

PURPOSE:

To better understand perceptions and experiences from Veterans regarding a new patient-centric prescription label that is being piloted at select medical centers and one consolidated mail outpatient pharmacy. The objective of the pilot is to provide Veterans with new labels on their medication orders that are easier to understand than existing labels. By more clearly communicating medication information (e.g., how much and when medication should be taken, expiration date, special instructions, drug interactions), the goal of the pilot is to allow Veterans to better understand the medications they are taking and reduce the chances of them being taken improperly.

The best way for the VA to understand if the new prescription labels are meeting their intended purpose is through a customer satisfaction qualitative survey. The short survey would ask Veterans to rate how clearly information related to the medication is displayed on the new label. The survey results will help inform the internal VA advisory committee to the effectiveness of the new labels and provide insights into whether improvements need to be made.

DESCRIPTION OF RESPONDENTS:

Potential survey respondents include all patients receiving outpatient medications from the approximately twenty-two Veterans Affairs Medical Centers and one mail outpatient pharmacy participating in the pilot study.
