**THE PAPERWORK REDUCTION ACT OF 1995** requires us to notify you that this information collected is in accordance with the clearance requirements of section 3507 of this Act. The public reporting burden for this collection of information is estimated to average **15 minutes** per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. No person will be penalized for failing to furnish this information if it does not display a currently valid OMB control number. Your obligation to respond to this survey is voluntary and failure to furnish this information will have no effect on any benefits you are entitled to.

Project ARCH (Access Received Closer to Home) is a pilot program operated by the Department of Veterans Affairs (VA) that allows eligible Veterans to receive care from non-VA medical providers near their homes. According to our records, you are eligible to participate in Project ARCH, but have not received care through the program.

Your answers to the following short questionnaire will help VA understand the reasons why some Veterans have not participated in Project ARCH.

Your answers and feedback are important to help VA improve the pilot program. Participation in this survey is entirely voluntary and all information is strictly private to the extent of the law. Participation in this survey will not affect your VA medical care.

Please read each question and check the box that best describes your opinion, using blue or black ink pen. Please be sure to read all the pages of this questionnaire.

When answering the questions, think only about the reasons why you have not received the medical care through Project ARCH.

Thank you very much!
