Routine Customer Feedback” (OMB Control Number: 2900-0571)**

TITLE OF INFORMATION COLLECTION:

VA Memorial Products Survey
(Headstones, Markers, Medallions, and Presidential Memorial Certificates)

PURPOSE:

This is an annual survey to assess satisfaction and customer focused improvement opportunities for key MPS products, services, and processes. Information gathered will provide overall satisfaction measures and multiple process indicators that will serve as a basis for process improvements, revised product service features, and the identification of new needs and expectations.

DESCRIPTION OF RESPONDENTS:

Two key customer groups:

- Next-of Kin
- Funeral Directors.

Next-of-kin are the primary customer for MPS products and services. The products are for their loved one (either as a headstone, marker, medallion to mark a gravesite or Presidential Memorial Certificate for family to remember the service provided to the nation). This primary group of customers may interact with MPS by independently completing forms and ordering products with assistance from others (usually a funeral director). Their input is critical to ensuring MPS processes and products are designed and delivered in a way that meets their needs during this difficult time.

Funeral directors often work with next-of-kin to identify needs, complete forms, and place orders for MPS products and services. Due to their role is assisting next-of kin during this critical time, MPS needs to understand their perceptions of our products, services, and the ease of using our processes.

The selection of your targeted respondents

1. Do you have a customer list or something similar that defines the universe of potential respondents and do you have a sampling plan for selecting from this universe?

[X] Yes [] No

If the answer is yes, please provide a description of both below (or attach the sampling plan)? If the answer is no, please provide a description of how you plan to identify your potential group of respondents and how you will select them?

Information will be gathered through administration of a paper survey. Potential sample group is identified from orders placed for headstones, markers, or medallions to be delivered to private cemeteries. The sample timeframe is from 7/2010 to 4/2011. A contractor designs a sampling plan and then pulls a sufficient number of orders (approximately 4,000) to ensure a statistically valid sample (95% confidence +/-5%) of both next-of-kin and funeral directors and be valid for the two main product lines (headstones and markers).

Administration of the Instrument

1. How will you collect the information? (Check all that apply)
 - Web-based or other forms of Social Media
 - Telephone
 - In-person
 - Mail
