Subject: Research Determination 17167: Tourette Syndrome National Education and Outreach Program

Dear Ms. Smith:

The proposed project titled "Tourette Syndrome National Education and Outreach Program" was reviewed by the NCBDDD Human Subjects Contact and determined to be:

PUBLIC HEALTH PRACTICE: Program Evaluation

The scope of all activities should be limited to public health practice and must not involve research activities.

Since the project is not considered to be research, no further action is required by CDC for human subjects protections in accordance with federal regulation for the protection of human subjects in research.

If this project involves CDC funds, contact Brenda Hayes of NCBDDD RMO for further guidance.

RE-REVIEW REQUIRED: The activities of this award should be monitored closely by the CDC project officer to ensure the activities do not involve research. The CDC project officer should request re-review of the activities periodically by the NCBDDD Human Subjects Contact to ensure the scope of the activities are still considered Public Health Practice.

Please save this email as documentation of the original determination.

Signed,

Scott
