

Attachment 11: ATTITUDES QUESTIONNAIRE  
Web-based Skills Training for SBIRT (Screening Brief Intervention and Referral to Treatment)  
August 2011

**OMB # 0925-XXX**

Expiration Date xx/xxxx

Public reporting burden for this collection of information is estimated to average less than 2 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Each time the assessment is completed, it is expected to be completed in a single sitting. **An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.** Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to: NIH, Project Clearance Branch, 6705 Rockledge Drive, MSC 7974, Bethesda, MD 20892-7974, ATTN: PRA (0925-xxxx\*). Do not return the completed form to this address.

**SBIRT Attitudes - administered at Baseline and Post-test**

|   | Strongly disagree<br>(-2) | Somewhat disagree<br>(-1) | Neither agree nor disagree<br>(0) | Somewhat agree<br>(1) | Strongly agree<br>(2) |
|---|---------------------------|---------------------------|-----------------------------------|-----------------------|-----------------------|
| a. There is no time during an office visit to assess substance use, much less conduct an intervention |                           |                           |                                   |                       |                       |
| b. Substance abuse treatment doesn't work   |                           |                           |                                   |                       |                       |
| c. Patients seen in primary care settings are very unlikely to have substance use problems            |                           |                           |                                   |                       |                       |
| d. Most people who have substance use problems are unemployed and not well-educated                   |                           |                           |                                   |                       |                       |
| e. Patients don't want to be asked about substance use; asking will alienate them                     |                           |                           |                                   |                       |                       |
| f. People who use tobacco or have alcohol or drug use problems don't want to change their behavior    |                           |                           |                                   |                       |                       |
| g. It is easy to identify patients with substance use problems by observing them                      |                           |                           |                                   |                       |                       |
| h. Addressing substance use problems is beyond the scope of primary care                              |                           |                           |                                   |                       |                       |
| i. It's extremely difficult to find substance use treatment programs for patients                     |                           |                           |                                   |                       |                       |
