MCS 005.037 NH Marriage (NMAR)

A. INTRODUCTION

The NH Marriage (NMAR) screen is used to record information about a NH's marriages.

B. NMAR SCREEN

The questions on NMAR screen pertain only to the NH. The NH may be a CL or deceased. The questions never pertain to a CL who is not a NH.

Reference: MSOM [COMMON 005.007](#) explains Beneficiary Marriage (BMAR). Complete BMAR for a CL who is not a NH.

NH Marriage (NMAR) is a mandatory screen for these claim types.

- surviving spouse
- surviving spouse with child in care

NH Marriage (NMAR) is a conditional screen for these claim types.

- LSDP
- disability
- surviving child
- ESRD
- dependent parent
- Medicare
- retirement

Additional NMAR screens appear when you answer "Y" in [17-M] OTHER MARRIAGES at the bottom of the screen.

Before You Begin

For NH's with multiple marriages, have a chronological list of the marriages ready before you begin completing the screen.

Order for Completing Screens

Complete NH Marriage (NMAR) beginning with the current (or most recent) marriage and work backwards.

Reason: MCS prints the application correctly, and the NH's marriage to the CL is recorded on DADE screens.

C. AUTOMATED SYSTEMS FEATURES

You can request up to 10 NH Marriage (NMAR) screens. If you need to list more than 10 NH marriages, complete:

- Remarks (RMKS), or
- a signed statement

MCS displays the 2nd through 10th iterations of any prior marriage dates. Each date is taken from the MARRIAGE DATE field of the preceding screen.

- Enter a "?" if the date of death is unknown.

Reminder: MCS displays this field only on the 1st screen for a NH who is a CL.

[19-M] OTHER MARRIAGES (Y/N): X

Enter "Y" or "N" to indicate whether the NH had another marriage.

Reminder

If this is a surviving spouse claim, describe the NH's marriage to the CL by the 10th screen, even if that marriage was the 11th (or more) marriage as you work backward.

Caution

Press ENTER and Stop if MCS displays this message:

MAXIMUM NUMBER OF MARRIAGES PRESENT

Reason: You can only request 10 NH Marriage (NMAR) screens. Document any other marriages in file. Use Remarks (RMKS) or a signed statement.

[20-C] DELETE SCREEN (Y/N): X

Reason: When you delete all of the NMAR screen this will change "EVER MARRIED" to "N" on:

- Identification (IDEN), in a life claim
- NH Identification (NHID) in a death claim

[21-D] PAGE NUMBER S

[22-C] TRANSFER TO: XXXX

G. RESULTS

After you complete this screen and press "ENTER", the next screen established in the claims path appears.
