

1FINAL SUPPORTING STATEMENT FOR  
NRC FORM 354  
"DATA REPORT ON SPOUSE"  
3150-0026  
---  
EXTENSION REQUEST

Description of Information Collection.

Nuclear Regulatory Commission (NRC) Form 354 must be completed by NRC contractors, licensees, applicants and others (e.g. intervenor's) who marry or cohabitate after completing the Personnel Security Forms, or after having been granted an NRC access authorization or employment clearance. Form 354 identifies the respondent, the marriage, and data on the spouse and spouse's parents. This information permits the NRC to make initial security determinations as to whether or not any information on a specific individual's form has an impact on the respondent's initial or continued eligibility for access authorization or employment clearance. This reporting requirement affects approximately 80 individuals annually.

A. JUSTIFICATION

1. Need for and Practical Utility of the Collection of Information.

Section 145 of the Atomic Energy Act (AEA) of 1954, as amended, requires, before an individual can be granted access to Restricted Data (RD), an investigation and report on the individual's character, associations and loyalty and a determination that permitting such a person access to RD will not endanger the common defense and security.

The basic security standard of Executive Order 10450, "Security Requirements for Government Employment," for employment, or retention of an individual in a sensitive position, is that such employment or retention is "clearly consistent with the interests of the national security." Executive Order 10865, "Safeguarding Classified Information within Industry," likewise permits the "... head of a department or his designee ..." to grant access authorizations for industrial employees (NRC contractors) "... only upon finding that it is clearly consistent with the national interest to do so." Executive Order 12968, "Access to Classified Information," requires "Eligibility [for access to classified information] shall be granted "... consistent with the national security interests of the United States ..."

10 CFR Part 10, Subpart B, "Criteria and Procedures for Determining Eligibility for Access to Restricted Data or National Security Information or an Employment Clearance," provides criteria to assist in making this determination. In order for NRC to implement this responsibility, it is essential, from a security standpoint, that NRC receive information concerning:

- (1) non-U.S. citizen spouses of NRC applicants,
- (2) non-U.S. spouses of NRC contractors, licensees, and others pending NRC access authorization processing,
- (3) spouses of NRC applicants, contractors, licensees or others who marry or cohabitate after applying for NRC access authorization, and

- (4) spouses of NRC contractors, licensees and others who marry or cohabitate after having been granted NRC access authorization.

The SF-86, revised in July 2008, is used for initial investigations and reinvestigation. The NRC Form 354 submitted only if marriage or cohabitation occurs after initial investigation, to provide the detail needed for NRC purposes. Specifically, the NRC Form 354 provides the following information concerning the spouse's citizenship and parents:

- (1) Whether the individual is a U.S. citizen, an alien or possesses dual citizenship. If a U.S. citizen, whether:
  - a) by birth;
  - b) derivative (including date, place, and certificate number); or
  - c) by naturalization (including date, place, and certificate number).

If alien, alien registration number, date of entry, port of entry and present citizenship are required.

- (2) Parents, to include name in full, date of birth, address, country of birth and present citizenship.

This level of detail is necessary to (1) permit the NRC Division of Facilities and Security (DFS) to determine whether or not any information on the form has an impact on the respondent's initial or continued eligibility for access authorization or employment clearance; and (2) permit the Federal Bureau of Investigation (FBI) to complete a name check of FBI files. Use of the NRC Form 354 will be limited to those individuals who marry or cohabitate subsequent to the completion of the SF-86 and who are not otherwise due for reinvestigation.

## 2. Agency Use of Information.

The information supplied identifies the respondent, the marriage, and data on the spouse and spouse's parents. This information permits DFS to make initial security determinations as to whether or not any information on a specific individual's form has an impact on the respondent's initial or continued eligibility for access authorization or employment clearance. Copies of the completed forms are sent to the FBI where a name check of FBI files is completed. In the case of non-U.S. citizen spouses and relatives, appropriate checks at other appropriate Government agencies are also completed. Upon receipt of the completed FBI and other agency checks, DFS makes second evaluations/determinations, based on developed information, as to whether any action is required concerning the respondent's initial or continued eligibility for access authorization or an employment clearance.

## 3. Reduction of Burden through Information Technology.

There are no legal obstacles to reducing the burden associated with this information collection. The NRC encourages respondents to use information technology when it would be beneficial to them. NRC issued a regulation on October 10, 2003 (68 FR 58791), consistent with the Government Paperwork

Elimination Act, which allows its licensees, vendors, applicants, and members of the public the option to make submissions electronically via CD-ROM, e-mail, special Web-based interface, or other means. However, a signature is required on NRC Form 354 and there are currently no means available for respondents to electronically sign the NRC Form 354. Hence, there are no electronic submissions for this form. It is estimated that approximately 0% of the potential responses are filed electronically.

4. Effort to Identify Duplication and to use Similar Information.

No sources of similar information are available. There is no duplication of requirements. NRC has in place an ongoing program to examine all information collections with the goal of eliminating all duplication and/or unnecessary information collections.

5. Effort to Reduce Small Business Burden.

The licensees and others affected by this information collection are not small entities or businesses.

6. Consequences to Federal Program or Policy Activities if the Collection is Not Conducted or is Conducted Less Frequently.

There is no established reporting frequency or period for submittal of NRC Form 354. This form is submitted only when an applicant marries or cohabitates after completing Personnel Security Forms or marries or cohabitates after receiving an access authorization. If the information is not collected at all, DFS will be unaware of marriages which have an impact on the respondent's initial or continued eligibility for access authorization or employment clearance until the next five or ten year reinvestigation depending on the level of security clearance. This could have an adverse effect on the national security.

7. Circumstances Which Justify Variation from OMB Guidelines.

There is no variation from OMB Guidelines in this collection of information.

8. Consultations Outside of the NRC.

Opportunity for public comment on the information collection requirements for this clearance package was published in the Federal Register on June 6, 2011 (76 FR 32379). No comments were received.

9. Payment or Gift to Respondents.

Not Applicable

10. Confidentiality of the Information.

Confidential and proprietary information is protected in accordance with NRC regulations at 10 CFR 9.17(a) and 10 CFR 2.390(b).

11. Justification for Sensitive Questions.

The NRC Form 354 request information regarding the individual's marriage and identifying information regarding his/her spouse/cohabitant and spouse's/cohabitant's parents. This information is essential for identification purposes and to permit NRC to make its determination regarding continued eligibility for access authorization in accordance with appropriate statutes, executive orders, and regulations.

12. Estimate of Burden and Burden Hour Cost.

It is estimated that 80 NRC form 354s will be completed annually. The annual burden is estimated to be 16 hours (80 respondents x 1 response per respondent x 0.2 hours per response). At a professional hourly rate of \$259/hr, the annual cost is \$4,144 (80 respondents annually x 0.2 hr/form x \$259/hr). The NRC does not anticipate an increase in the number of responses or respondents in the next three years.

13. Estimate of Other Additional Costs.

There are no additional costs.

14. Estimate of Annualized Cost to the Federal Government.

The annual cost to NRC of receiving and processing the form is approximately \$793. The estimate is based on staff experience in reviewing and handling NRC Form 354. The cost was computed as follows:

<b>Item</b>	<b>Amount</b>
Clerical time (80 reports x 0.2/hr x \$47)	\$752
Record holding (1.75 cu. ft x \$23.24/cu. Ft)	\$41
Total	\$793

This cost is fully recovered through license fees charged to NRC licensees pursuant to 10 CFR Parts 170 and 171.

15. Reasons for Change in Burden.

The overall burden increased by 4 hours from 12 to 16 hours because there was an increase in the number of forms received over the past 3 years, from 60 to 80 responses. In addition, the hourly rate increased from \$238/hr to \$259/hr.

16. Publication for Statistical Use.

None.

17. Reason for Not Displaying the Expiration Date.

Not Applicable.

18. Exceptions to the Certification Statement.

Not Applicable.

B. COLLECTIONS OF INFORMATION EMPLOYING STATISTICAL METHODS

Not Applicable.
