

## **Non-Substantive Change Request**

### **Generic Clearance for MAF & TIGER Updating Activities (0607-0809)**

The Census Bureau requests 15,000 additional burden hours under this generic clearance. The current period of approval extends through March 2013. There are only 1,184 hours left for use. This is insufficient to accommodate planned activities. Our plans include conducting Demographic Area Address Listing (DAAL) activities this year and next. This will require approximately 12,000 burden hours. The additional 15,000 hours will cover DAAL and any other as-of-yet unknown activities. The Census Bureau plans to formally resubmit this generic clearance for extension prior to its expiration. This submission will include a request for burden hours sufficient to cover activities anticipated over a three-year period.
