OMB Control #0693-0043

NIST Generic Clearance for Usability Data Collections

NIST is requesting an increase of the number of respondents and burden hours for this Generic Usability Data collection to meet the need of NIST Programs responsible for promoting U.S. economic growth by working with industry to develop and apply technology, measurements and standards.

NIST has been tasked to study certain aspects of the usability and accessibility challenges for Health Information and Technology (IT), which is a national priority. In particular NIST will be requesting participation input to develop federal strategies which would measure and access the use of Electronic Health Records (EHR) and the impact of their usability on its adoption, safety and innovation for the U.S. NIST will provide recommendations for development strategies which would encourage best practices and innovation for vendor products.
