*Note: Of the 78 participants visited in each Non-RIPA community (and the 117 participants visited in each RIPA community), 1 in 6 (approximately 17%) will undergo the Enhanced Protocol at the home visit, while the remainder will undergo the Standard Protocol. This corresponds to 65 participants under the Standard Protocol (97 for RIPA communities) and 13 participants (20 in RIPA communities) under the Enhanced Protocol.
