

**Supporting Statement for Forms SSA-4814-F5 and SSA-4815-F6
Medical Report on Adult with Allegation of Human
Immunodeficiency Virus Infection;
Medical Report on Child with Allegation of Human
Immunodeficiency Virus Infection
20 CFR, Subpart 416.933-.416.934
OMB No. 0960-0960-0500**

A. Justification

1. Introduction/Authoring Laws and Regulations

Section 1631(e)(i) of the *Social Security Act* (the *Act*) authorizes the Commissioner of the Social Security Administration (SSA) to gather information to make a determination about an applicant's claim for Supplemental Security Income (SSI) payments, this procedure is the Presumptive Disability (PD). Under the provisions of 20 CFR 416.933-416.934 of the *Code of Federal Regulations*, SSA or State agencies (DDS) may make findings of PD if the agencies find evidence that supports the probability that we will find the individual disabled. We use Forms 4814-F5 and 4815-F6 to collect medical information on the applicant's Human Immunodeficiency Virus (HIV) infection-related opportunistic and indicator diseases or other manifestations of HIV infection to make a finding of PD.

The criteria in the adult and child forms in OMB 0960-0500 follow the criteria in the HIV infection listings that were in the final rule for immune systems that we published in the Federal Register on July 2, 1993. We made a few minor revisions to the HIV infection listings in the final rule that we published for immune system disorders on March 18, 2008, which is the only time we have revised the HIV infection listings since we first published them in 1993.

2. Description of Collection

SSA uses Forms SSA-4814-F5 and SSA-4815-F6 to collect the information necessary to determine if an individual with HIV who is applying for SSI disability benefits, meets the requirements for presumptive disability payments. The respondents are the medical sources of the applicants for SSI disability payments.

SSA mails the appropriate paper form to the claimant's medical source for completion and to return to SSA. If SSA is unable to make a PD finding based on the information the applicant's medical source provides, the State agency is free to do so at its discretion.

- 3. Use of Information Technology to Collect the Information**
SSA did not create an electronic version of these forms under the agency's Government Paperwork Elimination Act (GPEA) plan because of the individualized nature of the evidence respondents will be submitting and due to the low volume of usage and the agency's limited resources. The number of respondents for each form is less than the GPEA cut-off of 50,000.
- 4. Why We Cannot Use Duplicate Information**
The nature of the information we are collecting and the manner in which we are collecting it preclude duplication. SSA does not use another collection instrument to obtain similar data.
- 5. Minimizing Burden on Small Respondents**
This collection does not affect small businesses or other small entities.
- 6. Consequence of Not Collecting Information or Collecting it Less Frequently**
If we did not use Forms SSA-4814-F5 and SSA-4815-F6, SSA would not be able to make PD payments for individuals with HIV infection. Because we only collect the information once, we cannot collect it less frequently.

There are no technical or legal obstacles to burden reduction.
- 7. Special Circumstances**
There are no special circumstances that would cause SSA to conduct this information collection in a manner inconsistent with 5 CFR 1320.5.
- 8. Solicitation of Public Comment and Other Consultations with the Public**
The 60-day advance Federal Register Notice published on October 20, 2011, at 76 FR 65315, and we received no public comments. The 30-day FRN published on January 13, 2012 at 77 FR 2114. If we receive any comments in response to this Notice, we will forward them to OMB.

We did not consult with the public in the maintenance of these forms.
- 9. Payment or Gifts to Respondents**
SSA does not provide payments or gifts to the respondents.
- 10. Assurances of Confidentiality**
SSA protects and holds confidential the information it collects in accordance with 42 U.S.C. 1306, 20 CFR 401 and 402, 5 U.S.C. 552 (Freedom of Information Act), 5 U.S.C. 552a (Privacy Act of 1974), and OMB Circular No. A-130.
- 11. Justification for Sensitive Questions**
The respondents for these forms provide medical information that is sensitive by its nature. However, SSA needs this information in order to permit an early PD determination for those individuals alleging HIV infection. Both forms contain an

explanation to the respondents that if they complete the form that their patients may receive early payments. The form will include a signed authorization for release of information by the respondents' patients.

12. Estimates of Public Reporting Burden

Collection instrument	Number of responses	Frequency of response	Average burden per response (minutes)	Estimated total annual burden (hours)
SSA-4814-F5	46,200	1	10	7,700
SSA-4815-F6	12,900	1	10	2,150
Totals	59,100	-	-	9,850

The total burden for this ICR is 9,850 hours. This figure represents burden hours, and we did not calculate a separate cost burden.

13. Annual Cost to the Respondents (Other)

This collection does not impose a known cost burden on the respondents.

14. Annual Cost To Federal Government

The annual cost to the Federal government is approximately \$273,042. This estimate is a projection of the costs for printing and distributing the collection instrument and for collecting the information.

15. Program Changes or Adjustments to the Information Collection Request

There are no changes to the public reporting burden.

16. Plans for Publication Information Collection Results

SSA will not publish the results of the information collection.

17. Displaying the OMB Approval Expiration Date

OMB granted SSA an exemption from the requirement to print the OMB expiration date on its program forms. SSA produces millions of public-use forms with life cycles exceeding those of an OMB approval. Since SSA does not periodically revise and reprint its public-use forms (e.g., on an annual basis), OMB granted this exemption so SSA would not have to destroy stocks of otherwise useable forms with expired OMB approval dates, avoiding Government waste.

18. Exceptions to Certification Statement

SSA is not requesting an exception to the certification requirements at 5 CFR 1320.9 and related provisions at 5 CFR 1320.8(b)(3).

B. Collections of Information Employing Statistical Methods

SSA does not use statistical methods for this information collection.
