#### SUPPLEMENTARY INFORMATION:

##### I. Abstract

Reclamation is responsible for approximately 6.5 million acres of land which directly support Reclamation's Federal water projects in the 17 western states. Under Title 43 CFR part 429, individuals or entities wanting to use Reclamation's lands, facilities, or waterbodies must apply using Form 7-2540. Examples of such uses are:—Agricultural uses such as grazing and farming;—Commercial or organized recreation and sporting activities;—Other commercial activities such as “guiding and outfitting” and “filming and photography;” and—Resource exploration and extraction, including sand and gravel removal and timber harvesting.

Reclamation reviews applications to determine whether granting individual use authorizations is compatible with Reclamation's present or future uses of the lands, facilities, or waterbodies. When we find a proposed use compatible, we advise the applicant of the estimated administrative costs and estimated application processing time. In addition to the administrative costs, we require the applicant to pay a use fee based on a valuation or by competitive bidding. If the application is for construction of a bridge, building, or

other significant construction project, Reclamation may require that all plans and specifications be signed and sealed by a licensed professional engineer.

The required 60-day comment period for the Use Authorization Application was initiated by a notice published in the **Federal Register** on December 2, 2011 (76 FR 75560). No public comments were received.

## II. Changes to the Use Authorization Application Form and Its Instructions

We changed the form and its instructions to expand the examples in the instructions of proposed uses for which an applicant may seek permission and changed language to more closely reflect the actual wording of 43 CFR part 429.

We made other changes to the form and the instructions to improve the readability and information-gathering. For instance, we re-organized the instructions and added headings. We moved some of the instructions from the first page to the second page and made more room on the first page for details about the proposed use.
