

Supporting Statement – Part A
Local Area Unemployment Statistics

A. Justification

1. Necessity of the Information Collection.

The Bureau of Labor Statistics (BLS) has been charged by Congress [Congressional Act of July 7, 1930 (29 USC, Section 1 and 2)] with the responsibility of collecting and publishing monthly information on employment, the average wage received, and the hours worked by area and industry. The process for developing residency-based employment and unemployment statistics is a cooperative Federal-State program that uses employment and unemployment inputs available in State agencies.

Estimates are prepared monthly in the State agencies, transmitted to the BLS for validation and publication, and provided to user agencies. These estimates are used for economic analysis and as a tool in the implementation of Federal policy in such areas as employment and economic development under the Workforce Investment Act of 1998 (that supplanted the Job Training and Partnership Act) and the Public Works and Economic Development Act, among others.

The estimates are used in economic analysis by public agencies and private industry and for State and area allocations and eligibility determinations according to legal and administrative requirements. Implementation of policy and legislative prerogatives could not be accomplished as now written without collection of the data.

The reports covered by the supporting statement are integral parts of the Local Area Unemployment Statistics (LAUS) program insofar as they ensure and measure the timeliness, quality, consistency, and adherence to program directions of the LAUS estimates and related research.

LAUS 8: Reports used annually to transmit information on the geographic definition of the area and estimating methodology used for Areas of Substantial Unemployment (ASU).

LAUS 15: Report prepared periodically to request and detail unusual treatment for estimation.

LAUS 16: Reports used annually to transmit LAUS estimates for ASU submittals.

LAUS 3040: LAUS Program Manual

2. Use of Information.

The Workforce Investment Act of 1998 (PL 97-300) requires these data:

- a. to allocate funds under Title II (Adult Education and Literacy programs);
- b. to implement Title I, which establishes state workforce investment boards, state plans, and local workforce investment areas. The local workforce investment

areas are to support a one-stop delivery system that provides core employment-related services and other employment and training services;

- c. to implement Title I, which provides that one of the standards for eligibility for services under the Act is that the ratio of participants being trained on the job in the public sector to participants in the private sector shall not exceed the ratio of civilian government employment to private sector employment in the area.

Other requirements include the use of these data:

- a. to allocate funds to States to establish and maintain public employment offices as required by the Wagner-Peyser Act (29 USC 49 et seq.) and to require that public labor exchange activities be part of the one-stop system and integrated into the state workforce development plan;
 - b. to indicate economic distress in areas to identify political jurisdictions eligible for Federal assistance under the Urban Development Action Grant Program (Section 119 of Title I of the Housing and Community Development Act (PL 93-383)). The standards include local unemployment as an indicator;
 - c. by the Employment and Training Administration to identify Labor Surplus Areas designated under Executive Orders 10582 and 12073 in the implementation of amendments to the Small Business Act (PL 96-302), which provides that Federal procurement contracts be set aside for businesses located in labor surplus areas;
 - d. to allocate Department of Commerce funds for certain programs to areas of high unemployment as required by the Public Works and Economic Development Act of 1965 (42 USC 3121).
3. Use of Electronic Collection Methods.

Increased automation of estimating procedures and the submittal of estimates remains a program objective. The State Time Series Analysis and Review System (STARS), introduced in 1989, and the LAUS State System Plus (LSS Plus), introduced in 1988 as the State Systems Project (SSP), are statistical software packages designed to assist in the production of employment and unemployment estimates for States and local areas. Both systems are revised and updated on a regular schedule. The STARS system was completely updated during Fiscal Year 2003 and moved from a mainframe platform to a web-based design. The LSS Plus system was also updated to accommodate program changes associated with the LAUS Redesign, a multi-year initiative that resulted in improvements to the methodology and geographic scope of the program. The LAUSOne System is currently being tested to move the functionality of the LSS Plus system to a web-based platform.

BLS continues to explore alternative methods to collect data now submitted on the Designation of Potential ASU (LAUS 8) and the ASU Data Collection Form (LAUS 16). States now have the option to submit these data electronically.

4. Efforts to Identify Duplication.

No other estimate exists of total resident employment and total resident unemployment on a monthly basis at the required level of geographic detail.

5. Impact on Small Businesses.

Small businesses or other small entities are not respondents in any of the information collections.

6. Consequences of Less Frequent Collection.

29 USC Section 2 states, “The Bureau of Labor Statistics, under direction of the Secretary of Labor, shall collect, collate, and report at least once each year, or oftener if necessary, full and complete statistics on the conditions of labor and the products and distribution of the products of the same ...” It also states “The Bureau of Labor Statistics shall also collect, collate, report, and publish at least once each month full and complete statistics on the volume of the changes in employment, as indicated by the number of persons employed ...” If the data were developed less frequently than monthly, certain of the allocation programs and trigger mechanisms referred to in items 1 and 2 would not be completed properly.

7. Special Circumstances.

Monthly collection of information is necessary in connection with the process outlined in LAUS 3040. Other data series are not available that are conceptually consistent with monthly national labor force measures, comparable across relevant geographies, or timely enough to implement the assistance programs for which LAUS estimates are used.

The collection of information in LAUS 8 and LAUS 16 regarding Areas of Substantial Unemployment occurs on an annual basis.

The collection of information in LAUS 15 regarding requests for exceptions or atypical treatment within LAUS methodology only occurs on an occasional basis in response to unusual situations or isolated data deficiencies.

8. Federal Register Notice and Consultation Outside the BLS.

No comments were received as a result of the Federal Register Notice published in 76 FR 59741 on September 27, 2011.

Over the years, the program has been discussed extensively with the Labor Market Information Committee of the National Association of State Workforce Agencies, the Workforce Information Council, the LAUS-MLS State Policy Council, the Bureau’s Research Advisory Committees, and the Employment and Training Administration.

9. Payment to Respondents.

Data for the program are collected and assembled by State staff. BLS is unaware of any arrangements to provide payments or gifts to respondents.

10. Assurance of Confidentiality.

An assurance of confidentiality is not provided to respondents.

11. Justification for Sensitive Questions.

Questions of a sensitive nature are not asked.

12. Estimate of Respondent Burden.

The hour burden of the collection of information is detailed below.

	LAUS 3040	LAUS 8	LAUS 15	LAUS 16
Number of respondents	52 (with 7320 reporting units)	52	6	52
Annual frequency of response	13	11	1	1
Annual responses	95,160	572	6	52
Estimated hours/response	1.5	1.0	2.0	1.0
Annual burden	142,740	572	12	52
Total annual responses	95,790			
Total annual burden hours	143,376			

Notes:

- LAUS 3040: The regular program submissions are monthly with an additional annual submission each year, making 13 submissions per State, the District of Columbia, and Puerto Rico (52 respondents) each year. The respondents provide monthly submissions for their jurisdiction as a whole and all of the labor market areas controlled by each of them. There are a total of 7,320 responses for the Nation as a whole. The 52 respondents – the 50 States plus DC and Puerto Rico – submit 7,320 responses per month plus an annual submittal for all the labor market areas identified for the program – $13 \times 7,320 = 95,160$ responses.
- LAUS 8: This is an annual activity, but some States need to submit more than one, and it averages to 11 submissions per State per year.
- LAUS 15: Not every State needs to submit a LAUS 15 each year. Based on past experience, about six States submit one during a given year.
- LAUS 16: This is an annual activity– each State submits one per year.

13. Estimate of Cost Burden.

The cost burden to respondents is borne by the Federal Government as defined within the cooperative Federal State program.

14. Cost to the Federal Government.

The annual Federal cost associated with the LAUS program in Fiscal Year 2011 is \$18,830,800. The BLS cost associated with the LAUS program is \$10,571,300. The State Workforce Agency portion of the LAUS program costs is \$8,259,500.

15. Changes in Respondent Burden.

BLS's estimate of respondent burden was adjusted to reflect the increased number of responses required due to the increase in the number of geographic areas estimated from 7,277 to 7,320. Changes in the number of estimated geographic areas resulted from changes in population rendering more areas eligible for estimation and from changes in the definition of areas enacted by the Office of Management and Budget.

16. Plans for Publication.

See attached publication schedule.

17. Request to Not Display Expiration Date.

Not applicable.

18. Exceptions to the Certification Statement.

This request complies with 5 CFR 1320.9.

2011 LAUS Due Dates and Publication Dates

(1)	(2)	(3)	(4)	(5)	(6)
Reference Month	<i>Employment Situation</i> News Release (Friday)	Due Date for LAUS Estimates		<i>Regional & State</i> News Release (Friday)	<i>Metro Area</i> News Release and All- Area Data Issuance (Wednesday)
		Statewide ¹ (Thursday)	All Areas ² (Friday)		
January	2/4	2/24	3/2 (Wed.)	3/10 (Thurs.)	3/18 (Fri.)

November	12/2	12/8	12/16	12/20 (Tues.)	1/4/2012
December	1/6/2012	1/12/2012	1/20/2012	1/24/2012 (Tues.)	2/1/2012

¹ Model inputs for States, the District of Columbia, the Los Angeles-Long Beach-Glendale Metropolitan Division, New York City, and the respective Balances of State and estimates for Puerto Rico.

² Includes model inputs for five additional modeled substate areas and their respective Balances of State.

NOTES: Release dates for January-February data do not follow the usual monthly schedule due to the longer processing time required for annual benchmarking and the need to spread out LAUS releases. In other months, the dates may vary from the norm due to federal holidays or conflicts with other BLS releases. All nonstandard days of the week are noted.
