Attachment 5

File Showing Addition and Subtraction of LAUS Areas

The following hypothetical *examples* illustrate the layout of the spreadsheet or text file that should be used to identify the LAUS area codes in cases of addition and subtraction.

The examples also illustrate the layout of the Add/Sub map in the ASUS system.

State name: Nebraska

ASU name: Northeast Nebraska

Method: Addition

Area codes:	**+**	CN311730	Thurston County
	+	SU310503*	Burt County ASU part
	+	SU310504*	Wayne County ASU part

State name: South Dakota

ASU name: Sioux Falls ASU

Method: Subtraction

| **Area codes:** | **Base** | PA460150 | Sioux Falls city |
| | - | PT460151 | Minnehaha County part |

* A State would create an "SU" code only if using the ASUS system.
