SUPPLEMENTARY INFORMATION:

I. Background

On July 20, 2011, the Commission voted to approve publication of a “notice of requirements” that would establish the criteria and process for the CPSC’s acceptance of accreditation of third party conformity assessment bodies (commonly referred to as “laboratories”) for testing, pursuant to ASTM International’s (formerly the American Society for Testing and Materials) (“ASTM”) *Standard Consumer Safety Specification for Toy Safety*, F 963-08 (“ASTM F 963-08”), and section 4.27 (toy chests) from ASTM International’s F 963-07ε1 version of the standard (“ASTM F 963-07ε1”). (For simplicity, we will refer to both standards as the “toy safety standard”).

The issuance of the “notice of requirements” by the Commission means that manufacturers of children’s toys must ensure that covered toys are tested for compliance with the toy safety standard by an accredited third party laboratory whose accreditation is accepted by the CPSC. The “notice of requirements” also means that based on the results of the third party testing, toy manufacturers must issue a written children’s product certificate that certifies the compliance of each covered toy to the toy safety standard. The Commission will enforce these third party testing and certification requirements beginning with those covered toys manufactured after December 31, 2011.

Given the likely impact on those who manufacture or import toys that are covered by the toy safety standard, we believe that it is important to engage in a strategic outreach and education plan to the business community and other stakeholders. An effective outreach and

education plan will target the affected group of stakeholders and give the small business community and other stakeholders clear and detailed information to enable them to plan and act accordingly and make more informed and timely business decisions.

This notice describes our outreach and education plan. We intend to make information on our plan and on the toy safety standard available at: <http://www.cpsc.gov/toysafety> by September 30, 2011.

We envision three stages for this strategic outreach and education plan:

- Stage 1 will inform stakeholders generally about the need to test and certify to the toy safety standard. We plan to use traditional and social media to communicate the toy safety requirements and the effective compliance date of January 1, 2012. In addition, staff will target relevant trade publications, industry organizations, consumer groups, and others to ensure that the communications message is disseminated widely and to solicit additional outreach ideas and targets. The Small Business Ombudsman will publish a plain English guide on the requirements. Additionally, we hope that the publication of this document in the **Federal Register** may elicit additional suggestions and ideas.

- Stage 2 will provide detailed “Frequently Asked Questions” (“FAQs”) and examples so that stakeholders can better understand the requirements and staff’s interpretations of certain provisions before the requirements go into effect. We believe that issuing FAQs in a timely fashion will allow the small business community and other stakeholders to plan and act accordingly to make more informed and timely business decisions. Traditionally, we have used FAQs as a means of explaining new regulations and requirements; however, we are also exploring other means of illustrating the toy safety requirements, such as instructional videos and webinars.

- Stage 3 will begin after we have developed the materials to educate stakeholders. We will target our ongoing education campaign efforts to promote higher rates of compliance with the toy standard and the testing and certification requirements. We will attend industry trade shows, as funding permits, and make presentations about the new requirements. In addition, we will attend international meetings, conferences, trade shows, and other public forums, as funding permits, where we will speak about the new requirements and serve as a resource for companies seeking additional information.
