

**Attachment O-Reminder e-mail for LABORATORY non-responders**

Dear Dr. \_\_\_\_\_

We have not yet received your response to the information request from the CDC Newborn Screening and Molecular Biology Branch. The newborn screening LABORATORY data collection instrument was designed to minimize the burden of this information request and should take 10-15 minutes to complete. You may designate another person from your laboratory who is familiar with CDC newborn screening laboratory activities to answer the questions on your behalf. The SurveyMonkey questionnaire can be accessed at the following URL:  
[http://www.surveymonkey.com/s/newborn\\_screening\\_laboratory](http://www.surveymonkey.com/s/newborn_screening_laboratory).

The survey will officially close on (Insert date). We would appreciate hearing your thoughts about current and potential CDC NSMBB activities and would also like to know more about SUAC testing in your newborn screening laboratory. This information will help us better serve newborn screening laboratory needs across the United States.

If you have any questions regarding the survey, please contact Carla Cuthbert, Ph.D., Branch Chief, Newborn Screening and Molecular Biology Branch, CDC by phone 404-488-7571 or email [ccuthbert@cdc.gov](mailto:ccuthbert@cdc.gov).

We look forward to seeing your response.
