### **Header: CDC Surveys to Assess Impact of Newborn Screening**

SurveyMonkey questionnaires have been sent to all State Newborn Screening Program and Laboratory Directors. Information from these surveys will be used to assess the capacity and needs of newborn screening laboratory activities across the United States. The surveys will provide CDC with information to highlight the remarkable and underappreciated impact of newborn screening over the past 50 years, to be presented as part of the 2013 *50 Years of Newborn Screening* campaign. This information will also identify ways for CDC to better support state newborn screening laboratory activities. Please submit your survey by \_\_\_\_\_. If you have any questions, please contact Dr. Carla Cuthbert, Branch Chief for the CDC Newborn Screening and Molecular Biology Branch, at [ccuthbert@cdc.gov](mailto:ccuthbert@cdc.gov)
