

## Foodborne Diseases Active Surveillance Network (FoodNet)

The Foodborne Diseases Active Surveillance Network, or FoodNet, has been tracking trends for infections commonly transmitted through food since 1996. FoodNet provides a foundation for food safety policy and prevention efforts. It estimates the number of foodborne illnesses, monitors trends in incidence of specific foodborne illnesses over time, attributes illnesses to specific foods and settings, and disseminates this information.

### FoodNet Topics

#### About FoodNet

Tracking trends for infections commonly transmitted through food...

#### Surveillance

Active surveillance system for laboratory-confirmed cases of infection...

#### Studies and Surveys

Laboratory, physician, population, and other studies and surveys...

#### Data, Statistics, & Publications

Trends, data tables and figures, reports, publications, fast facts...

#### FoodNet Sites

Collaborative program with 10 health departments, USDA, and FDA...

#### Resources

Web, print, and other resources for states, partners, and the public...

### Spotlight

#### 2012 FoodNet MMWR Report

#### Associated Tables & Figures

### FoodNet Supplement—A Foundation for Food Safety in the United States

#### 2011 FoodNet Annual Report **[PDF - 53 pages]**
