

Questionnaire Skip Set Up Guidelines

Goals:

- Ensure all skip setup included in the questionnaire is consistent with skip logic rules
- Decrease down time due to skip corrections within submitted surveys

Basic Skip Rules:

"Other Please Specify" (OPS) Skip Rules:

Type 1 "Other Please Specify" Rules (Text box to the right of the answer choice "Other, please specify:") :

- 1 OPS questions must be set up as a radio-button or checkbox to have the text box appear next to the answer choice "Other, please specify:"
- 2 The open ended text box for "Other Please Specify" has it's own question ID and needs **full question text** included in questionnaire. (This will be used by clients, SRAs, etc, in the portal and comment cluster to differentiate between OPS questions within a measure)
- 3 The open ended text box has a character limit of 100. No exceptions! if more characters are needed, please request a Type 5 group.
- 4 In the special instructions column, indicate that this is a "OPS Group" for the PARENT and CHILD questions.

Type 5 "Other Please Specify" Rules (More than two questions within question group):

- 1 Open-ended boxes will not show up next to the answer choice "Other" in this type of skip logic. They will pop as separate questions that require additional question text. Please include full question text.
- 2 Radio-button, checkbox or drop-down CQs can have an "other please specify" in this type of skip set up but the text box will pop as a separate question.
- 3 In the special instructions column, indicate that this is a "Skip Logic Group" for the PARENT and CHILD questions.

Please refer to the Current Custom Qsts tab for examples (OPS Type 1 and OPS Type 5 are marked in the comment boxes)

General Skip Rules:

- 1 The parent question must come first, and child questions must immediately follow. Skip logic groups cannot be broken up by other questions that are not included within the skip.
- 2 A CQ can only have one parent question; a single question CANNOT be triggered by different questions.
- 3 Answers within one question can be set up so that different answer combinations trigger different questions, through the use of "answer groups".
- 4 A question can only be a part of ONE group type i.e. skip logic, matrix, or multiple lists
- 5 Horizontal scale questions CANNOT be parent CQs, but they can be child CQs. NOTE: By changing a horizontal scale question to a dropdown they can become parent questions.
- 6 Open End text questions cannot be a parent questions, but they can be child CQs.
- 7 Multi-select questions can be used in skip logic.

As a general tip for SRAs: The more complex the skip logic, the more difficult it is to keep the tabs and labels concise in SPRs. It is important to know when to just use filters versus creating skip logic.

Caution: Measures without enhanced/segmented reports might require intricate skip to gather necessary data for standard reports.
