Preliminary Questions (P)

1. Including yourself, please tell me the age and sex of everyone currently living in this household. Please do not include students living away at school.

IF NEEDED: By knowing how many people are in the household, CPSC can compare the survey answers of all households of similar size and make-up. This will allow CPSC to better determine how baby products are used. **IF NEEDED:** Include adults who think of this household as their primary place of residence. Include adults who usually stay in the household but are temporarily away on business, vacation, or in a hospital.

IF NEEDED TO CALCULATE AGE IN MONTHS FOR CHILDREN UNDER AGE 6: For children under 6, please give me the month and year of birth.

Age	Sex	Age	Sex	Age	Sex	Age	Sex

IF THERE ARE ANY HH MEMBERS UNDER AGE 6: For this survey we will be talking about products used with children under age 6.

The next questions ask about products used to bathe an infant. There are three main types of bathing products for infants.

Infant bath tubs hold water and can be placed into an adult bath tub, a sink, or on top of other surfaces. The child can be seated or laid in a reclining position.

Infant bath seats are generally used in adult bath tubs with children who are able to sit up. They do not hold water.

Bathing aids are a cushion, pad, or seat that allows a child to be bathed lying down. They do not hold water.
