

Early Career Doctorates Needed for NSF Research Interviews

If you earned a Ph.D. or other doctorate degree in the last 10 years you're eligible!
\$50 for your participation

The National Science Foundation (NSF) is planning a national survey of recent doctorate recipients in all fields, including non-science fields. Early career doctorates in all positions including postdocs, faculty, and non-faculty will participate in the survey. The study will provide NSF with information about the career paths and research opportunities for persons who earned their doctorate degree within the last 10 years.

In July, RTI International*, a local research organization in Research Triangle Park (RTP), will be conducting one-on-one interviews with early career doctorates to help inform the study design. The interview will take about 90-120 minutes after which time participants will receive a gift of \$50 cash as a token of appreciation.

For more information or to volunteer for participation, please contact RTI International using the information in the tear-off slips below.

*RTI International is a trade name of Research Triangle Institute.
