

Paperwork Reduction Act Statement

Public reporting burden for this collection of information is estimated to average 7 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other suggestions for reducing this burden to Chris Ellis, NOAA National Ocean Service, at Chris.Ellis@noaa.gov, or contact him at 843-740-1195.

Respondents are not identified on their questionnaires, and any reports will present data in aggregate form only. Notwithstanding any other provisions of the law, no person is required to respond to, nor shall any person be subjected to a penalty for failure to comply with, a collection of information subject to the requirements of the Paperwork Reduction Act, unless that collection of information displays a currently valid OMB Control Number.

Air Stagnation Survey Questions

There was an air stagnation event that occurred in your area on the (morning, afternoon, evening) of (month) (date), (year). The National Weather Service is looking to receive feedback on the weather information you may have received during this event. We would appreciate it if you answered the following questions regarding that specific air stagnation event. Feedback collected from this survey will help the NWS improve products and services with future events in your area.

The following questions have to deal with the information you may have received **before the air stagnation event** and the actions you may have taken.

1. People rely on various sources of information when making a decision to prepare for hazardous weather events. Please indicate how the following sources influenced your decisions on how to prepare **before this air stagnation event occurred**.
