## **NOAA SEA Evaluation**

### **Introduction/Contextual information**

The National Oceanic and Atmospheric Administration's Sea Earth Atmosphere (NOAA SEA) curricular resource materials were created for 3<sup>rd</sup>, 4<sup>th</sup> and 5<sup>th</sup> grade educators. This suite of resources includes hands-on activities and innovative technologies to engage students and teachers. NOAA would like the opportunity to improve these resource materials to better serve the education community. This survey will assist NOAA in determining where to begin realigning the materials to either the Common Core or Next Generation Science Standards (NGSS) in addition to what types of products and services should be offered to educators. Your participation in this survey is completely voluntary. The survey will take approximately 15 minutes to complete.
