

**Survey of IWRSS Stakeholders of River Basin Commissions in the Mid-Atlantic
Invitation and Reminder Emails**

Invitation Email Text:

Subject: Survey on Water Resources Information Needs in the [RIVER BASIN]

Dear Colleague,

The National Oceanic and Atmospheric Administration's National Weather Service is conducting a survey of stakeholders in four river basins (Hudson, Delaware, Potomac and Susquehanna) in the Mid-Atlantic to learn more about the use of water resources information for decision making and identify opportunities for filling information gaps with new products and services. You have been selected for this survey because of your interest and participation in water resources decision making in the [RIVER BASIN].

Please participate in this 45 minute survey to share your views about your water resources priorities, information needs, and the value of filling those information needs. Please complete this survey by [DATE].

[Survey link]

The feedback gathered through this survey will be used to identify new products and services that will guide planning activities in support of a proposed demonstration of new Integrated Water Resources Science and Services (IWRSS) capabilities in the Mid-Atlantic region. IWRSS is supported by a consortium of federal agencies with complementary missions in water science, observation, management and prediction: The U.S. Geological Survey (USGS), U.S. Army Corps of Engineers (USACE), and the National Oceanic and Atmospheric Administration (NOAA).

If you have any questions or comments regarding this evaluation, please contact [NAME] at [PHONE] or [EMAIL].

Thank you,
[NAME]

Reminder Email Text:

Subject: Survey on Water Resources Information Needs in the [RIVER BASIN]

Dear Colleague,

Recently we sent you an invitation to participate in a brief survey about water resources information needs in the [RIVER BASIN]. The feedback gathered through this survey will be used to identify new products and services that will guide planning activities in support of a proposed demonstration of new Integrated Water Resources Science and Services (IWRSS) capabilities in the Mid-Atlantic region. Please consider participating in this survey by [DATE].
