Subject: public comment on federal register FW: let the private cancer groups get out the message - give taxpayers a break

let the private agencies do and pay for this survey. this agency just wants to nail american taxpayers to the wall for money money money. certainly the taxpayers of america have been paying into this agency for the past 60 years and the answer to this question should have been secured ten times over that course of time and taxpayer spending. it is strange that it comes up for funding now after 60 years of out of control spending on this area. since the epa and fda both allow endless poisons to poison americans with toxic chemicals, it is clear it is a miracle if one escapes getting cancer. one has to wonder how epa and fda get away with the monstrous performance that they do in not really protecting america but working for toxic chemical polluters that cause cancer. i do not believe "communications" can keep cancer away. you can do everything they tell you, but the poisons are out there from epa and fda.

american taxpayers need relief from these out of control spending agencies like cdc which is no totally non productive. under their spending program, americas health has slipped from no. 1 in the world to 27th. beaten by romania, a third world country. i do not favor this project or this spending. this budget should be zero.
jeanpublic address if required

cut this budget to zero
