The state identifies which drugs are considered to be non-preferred.

☑ The state assures that it has a timely process in place to limit cost sharing to the amount imposed for a preferred drug in the case of a non-preferred drug within a therapeutically equivalent or similar class of drugs, if the individual's prescribing provider determines that a preferred drug for treatment of the same condition either will be less effective for the individual, will have adverse effects for the individual, or both. In such cases, reimbursement to the pharmacy is based on the appropriate cost sharing amount.

Beneficiary and Public Notice Requirements

☑ Consistent with 42 CFR 447.57, the state makes available a public schedule describing current cost sharing requirements in a manner that ensures that affected applicants, beneficiaries and providers are likely to have access to the notice. Prior to submitting a SPA which establishes or substantially modifies existing cost sharing amounts or policies, the state provides the public with advance notice of the SPA, specifying the amount of cost sharing and who is subject to the charges, and provides reasonable opportunity for stakeholder comment. Documentation demonstrating that the notice requirements have been met are submitted with the SPA. The state also provides opportunity for additional public notice if cost sharing is substantially modified during the SPA approval process.
