

Welcome!

Thanks for agreeing to help the Bureau of Labor Statistics (BLS) with this survey on job-search methods. The purpose of this survey is to collect information about the types of activities people engage in when searching for a job. Your answers will help us improve questions and interviewing procedures for BLS surveys that collect information about employment-related activities.

This survey is voluntary and your answers will be used for research purposes only. We expect that the survey will take no more than 15 minutes to complete, and you may stop at any time. This survey has been approved by OMB under control number 1220-0141, with an expiration date of February 28, 2015. Without a currently valid number BLS would not be able to conduct this survey.

Please note that this survey is being administered by SurveyMonkey.com and resides on a server outside of the Bureau of Labor Statistics (BLS) domain. The BLS cannot guarantee the protection of survey responses and advises against the inclusion of personally-identifiable information--such as your full name, phone number, e-mail address, etc.--in any response.

We greatly appreciate your feedback! If you have any questions about the survey, feel free to contact Scott Fricker (fricker.scott@bls.gov) for more information.

11. Thinking about the amount of time you spent using the Internet on your most recent job search, what percentage of your time (out of 100% of your total Internet-based job-search activities) would you say that you spent looking at job listings and what percentage was spent filling out applications, contacting employers, sending out resumes, etc.?

Looking at job listings

Filling out applications, contacting employers, sending out resumes, etc.

12. Sometimes we refer to job search methods as either “active” or “passive.”

Active job search methods are those in which a person could be offered a job or get an interview with no further action (e.g., submitting an application for a job)

Passive job search methods are those in which a person would have to do something else before she/he could get a job offer or an interview (e.g., reading the help wanted ads)

We have listed a few job-search activities below and are interested in whether people think these activities should be considered an Active job-search activity or a Passive job-search activity. There are no ‘right’ or ‘wrong’ answers here, so please just tell us what you think.

If you are unfamiliar with the activity or unsure how to answer, please indicate that.
