For the next part of the interview, you will need to look at the images enclosed in the packet you received about the study.　You will also need the worksheets that were sent in the packet.

Now please look at image #6.　This is a street in your neighborhood where we've sketched a number of improvements.　I want you to imagine that these improvements have been at both ends of your trip.　Consider how it would be for you to drive, take public transit, walk, or cycle in this different environment.

Thinking about the same trip from your starting location to your main activity of the day, please answer the following questions while keeping this different environment in mind.　Please consider using the single mode of transportation I ask you about.

For each statement I will ask you to tell me whether you strongly agree, agree, are neutral, disagree, or strongly disagree.　All of the items will use the same scale.　For each statement, please tell me which point on the scale best describes your response.

Please think of driving or riding in a car in the new environment, including parking if necessary.	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree	NO CODED RESPONSE APPLICABLE	DON'T KNOW	REFUSED

In order to complete the next section, I need to calculate some values based on the answers you've given me during our interview. This will take me just a few minutes. Thanks for your patience as I bring up these values.

You will need the worksheets we provided for the following exercise. I will start by giving you values to fill in on one of the worksheets. These are the choices you'd have available to you for this trip in the new environment we've sketched in image #1. In the image, you'll see a new kind of transit bus that could circulate frequently through your neighborhood and drop people off at the CTA station or station area. We'll call that the "Community Transit Bus." Please imagine that the improvements displayed in this image exist all along your route to the train station and think about how you might get to your main activity of the day in this new environment.

	Drive	Community Transit Bus to CTA Station/Station Area	Walk to CTA Station or Station Area	Cycle to CTA Station or Station Area	Cycle to your destination
Time to the station	N/A	A minutes	B minutes	C minutes	N/A
CTA travel time (station to station NOT including wait time)	N/A	D minutes	D minutes	D minutes	N/A
Parking Cost	$ E	N/A	N/A	N/A	N/A
Community Transit Fare		Free	Free	Free	N/A
CTA Frequency	N/A	Every F minutes	Every F minutes	Every F minutes	N/A
CTA Fare	N/A	$2.25	$2.25	$2.25	N/A
Community Transit vehicle frequency	N/A	every G minutes within a half block of your house	N/A	N/A	N/A
Total door-to-door time	H minutes	I minutes	J minutes	K minutes	L minutes

I'm going to give you some time to review each worksheet and image before I ask the next question. Each column in worksheet #1 summarizes a different way of getting to your destination in the new environment that image #1 displays. Please let me know if you have questions about it as you review them. Please keep in mind that the scenarios we present are hypothetical, so some of the costs and travel times may not be the same as what you reported earlier.

Are you ready for the question?

132.   Of the five types of transportation presented here, which mode would you select for your trip? Would you...

          <1>   drive or be driven/dropped off by someone else,
          <2>   take the Community Transit Bus to CTA Station/Station Area,
