

FR Y-14Q: Retail HELOAN Second Lien Schedule Instructions

This document provides general guidance and data definitions for the HELOAN Second Lien Schedule. For first mortgage and HELOC products, see the separate instructions and schedules.

In this schedule, bank holding companies (BHCs) should report all US loans reported on line 1.c.2.b of schedule HC-C of the FR-Y9C.

For the first reporting period (September 2011), BHCs should report monthly portfolio-level data for the HELOAN second lien portfolio by segments from January 2007 to the first reporting period. For subsequent periods, the reporting Bank Holding Company (BHC) is required to report data for the months within the reporting period. The required segments are presented in Table A below. Reporting BHCs should to segment the Owned (not serviced for others) mortgage portfolio by: accounting treatment; original FICO score or equivalent; geography; vintage; original combined Loan-to-Value (CLTV); delinquency status; and origination channel. Report only owned loans. Include both held for investment (HFI) and held for sale (HFS) loans. More information on each of these segments can be found in Section A of these instructions. Start each row of data with your BHC name (SAS Variable: BHC_NAME), your RSSD ID number (SAS Variable: RSSD_ID), the reporting month (SAS Variable: REPORTING_MONTH), and Portfolio ID (SAS Variable: PORTFOLIO_ID) (use **Hel oan** for your portfolio ID within this schedule).

Table B below lists the summary variables that are to be reported for each portfolio segment. Definitions for each of these variables can be found in Section B, *Summary Variables*, of these instructions. **Provide all dollar unit data in millions of dollars (\$ Millions). Reporting BHCs should use the SAS variable names and SAS data types provided on the table for the submission.**

The *HELOAN 2nd Example* — Table B exhibit provides an example of the dataset to be submitted. Columns D to L of this worksheet indicate the specific reported segments while the remaining columns contain the requested summary variables. Rows 3 to 60 are for the following specific segment: ASC 310-30 Status of purchased impaired; original FICO score or equivalent ≤ 680 ; in Region #1; originated in 2005 or before; with an original LTV of $\leq 65\%$; current or 1-29 days past due; and originated through the retail channel. A new segment starts in row 61. This segment has the same characteristics as the prior segment except that its origination channel is “all other”. There are two ASC 310-30 segments, four original FICO score segments, six geography segments, six vintage segments, four original LTV segments, six delinquency status segments, and two origination channel segments. This results in a maximum size dataset with 13,824 rows of data per reporting month ($2 \times 4 \times 6 \times 6 \times 4 \times 6 \times 2 = 13,824$). **Reporting BHCs should submit all data files in SAS format (version 7 or higher) only.** Include in the submission all segments that are not applicable (e.g., there are no loans or accounts in those segments) such that the dataset always has 13,824 rows of data per reporting month. For the summary variables, assign a SAS missing value (“.”) if information is not applicable or not available.

Table C below lists the variables that should be reported for each portfolio segment only for the most recent reporting-month (no need for historical data). Definitions for each of these variables can be found in Section C, *Snapshot Metrics*, of these instructions. These variables, along with the Table B Summary Variables, should be summarized for each portfolio segment and submitted in a separate SAS file. Reporting BHCs should **use the SAS variable name and SAS data type provided on the table for the submission.** The *HELOAN 2nd Example – Table B & C* exhibit provides an example of the dataset to be submitted.

Reporting BHCs should provide a segment ID for each reported segment. This segment ID should be a unique fourteen-digit identifier where each of the pairs of the fourteen digits refers to a specific classification for each of the seven segmentation categories. Refer to Table A below for the attribute codes for the seven segmentation categories. For example, in the *HELOAN 2nd Example – Table B* exhibit, the first segment listed has the segment ID 01010101010101 because each of the attributes for this segment is in the primary position of the attributes list in Table A below. Starting with Row 61, the second example segment has the segment ID 01010101010102 because all of the attributes are the same as the prior segment except that origination channel is now "All Other", which is listed in the second position of the attributes list in Table. **Do not drop leading zeros.**

For the requested summary variables, report Unpaid Principal Balance gross of any partial charge-offs that may have been taken on the loan. For the *\$ gross contractual charge-offs*, *\$ bankruptcy charge-offs*, *\$ recoveries*, and *\$ net charge-offs* report the dollar amount of charge-offs or recoveries for the segment being reported only in the month that they occurred. For the delinquency status segmentation, categorize charge-offs or recoveries by delinquency status at charge-off. A summation of charge-offs or recoveries across the delinquency buckets for a given month should thus result in the total charge-offs or recoveries recorded by the institution in that reporting month.

Table D requests certain aggregate data about loans in the portfolio that should be excluded from the amounts reported in Tables B and C. Definitions for each of these variables can be found in Section D, *Excluded Accounts*, of these instructions. The *HELOAN 2nd Example – Table D* exhibit provides an example of the dataset to be submitted.

To summarize, the HELOAN schedule submission should include three separate SAS files:

1. From January 2007 – present, the summary variables in Table B should be reported in the segments described in Table A.
2. For the most recent reporting month only, the summary variables in Tables B and C should be reported in the segments described in Table A.
3. For the most recent reporting month only, the summary variables in Table D should be reported in aggregate. No segmentation is required.

A. Segments

For each of the summary variables and snapshot metrics (to be described in further detail in Section B, Section C, and Section D), information should be reported for the following segments:

1. **Accounting Treatment** – This refers to accounting treatment of loans reported in this schedule. Reporting BHCs should segment the portfolio into the following three segments:
 - a) HFI purchased impaired - Held for investment loans accounted for in accordance with ASC Subtopic 310-30, Receivables – Loans and Debt Securities Acquired with Deteriorated Credit Quality (formerly AICPA Statement of Position 03-3, Accounting for Certain Loans or Debt Securities Acquired in a Transfer), that a bank holding company has purchased.
 - b) HFI FVO / HFS - Held for Investment loans measured at fair value under a fair value option or loans held for sale, whether measured at the lower of cost or fair value or at fair value under a fair value option.

- c) Other - Held for Investment loans not measured at fair value and not purchased impaired
2. **Original FICO Score or Equivalent** – Reporting BHCs should segment the portfolio by original FICO score or equivalent. The FICO score can be based on the credit bureau service the institution uses as its source. Original FICO score reflects the score upon which the original underwriting decision was based. If the bank does NOT obtain original FICO scores, map the internal score or other bureau score used for FICO scores and report that score. **If original FICO score or equivalent is missing or unavailable for a loan, do not report any data for that loan on Tables B or C. Instead, include the loan on Table D only.** Segment the portfolio into the following four segments:
- a) ≤ 660
 - b) > 660 and ≤ 680
 - c) > 680 and ≤ 720
 - d) > 720
3. **Geography** – Reporting BHCs should report the region in which the property is located. Segment the portfolio into the following six geographical area designations:
- a) Region 1: Arizona, California and Nevada
 - b) Region 2: Florida
 - c) Region 3: Illinois, Indiana, Michigan, Minnesota, Missouri, Nebraska, Ohio, Wisconsin, North Dakota, South Dakota, Iowa, Kansas
 - d) Region 4: Connecticut, Delaware, Massachusetts, Maryland, Maine, New Hampshire, New Jersey, New York, Rhode Island, Virginia, Vermont and Washington DC
 - e) Region 5: Georgia, Alabama, Kentucky, Louisiana, Mississippi, North Carolina, Pennsylvania, South Carolina, Tennessee, West Virginia and US Territories (Puerto Rico, Guam, etc.)
 - f) Region 6: Colorado, Idaho, Oregon, Washington, Montana, New Mexico, Alaska, Oklahoma, Texas, Arkansas, Utah, Wyoming, and Hawaii
4. **Vintage** – Vintage refers to the calendar year that the account was originated. There are six possible vintages to report:
- a) 2005 and Before
 - b) 2006
 - c) 2007
 - d) 2008
 - e) 2009
 - f) 2010 & 2011
5. **Original CLTV** – The original combined loan-to-value ratio is the original amount of the loan, in addition to any senior liens, divided by the property value at the time of origination. **If original CLTV is missing or unavailable for a loan, do not report any data for that loan on Tables B or C. Instead, include the loan on Table D only.** Segment the portfolio as follows:
- a) ≤ 65
 - b) > 65 and ≤ 80
 - c) > 80 and ≤ 90

d) > 90

6. **Delinquency Status** – Reporting BHCs should segment the portfolio into the following six delinquency statuses:
 - a) Current & 1-29 DPD: Accounts that are not past due (accruing and non-accruing) or are 1-29 DPD (accruing and non-accruing) as of month-end.
 - b) 30-59 DPD: Accounts that are 30 to 59 days past due (accruing and non-accruing) as of month-end.
 - c) 60-89 DPD: Accounts that are 60 to 89 days past due (accruing and non-accruing) as of month-end.
 - d) 90-119 DPD: Accounts that are 90 to 119 days past due (accruing and non-accruing) as of month-end.
 - e) 120-179 DPD: Accounts that are 120 to 179 days past due (accruing and non-accruing) as of month-end.
 - f) 180+ DPD: Accounts that are 180 or more days past due (accruing and non-accruing) as of month-end.

7. **Origination Channel** – Reporting BHCs should segment the portfolio into the following two origination channels:
 - a) Retail
 - b) All Other– non-retail origination channels, including wholesale, broker, correspondent, etc.

B. Summary Variables

For each of the segments described above and for each reference month, report information on the following summary variables:

1. **# Accounts** – Total number of accounts on the book for the segment being reported as of month-end.

2. **\$ Outstandings** – Total principal amount outstanding as of the end of the month. This should be reported as Unpaid Principal Balance (UPB) gross of any charge-offs. In other words, the \$ outstanding should not reflect any accounting based write-downs and should only be reduced to zero when the loan has been liquidated – either paid in full, charged off, or Real Estate Owned (REO) sold.

3. **# New Accounts** – The total number of new accounts originated (or purchased) in the given month for the segment being reported as of month-end.

4. **\$ New Accounts** – The total dollar amount of new accounts originated (or purchased) in the given month for the segment being reported as of month-end.

5. **# Sold in Month** – The total number of accounts for the segment being reported that were sold in the reporting-month. Sales may be to GSEs, to private investors, or in the form of bulk asset sales.

6. **\$ Sold in Month** – The total Unpaid Principal Balance of loans in the segment being reported that were sold in the reporting-month. Sales may be to GSEs, to private investors, or in the form of bulk asset sales.

7. **\$ Gross Contractual Charge-offs** – The total Unpaid Principal Balance for the segment being reported that was contractually charged off during the month. All interim FFIEC write-downs should be included in gross contractual charge-offs in the month that they are taken. Report principal charge-offs only, not interest and fees. For the delinquency status segmentation, categorize charge-offs by delinquency status at charge-off.
8. **\$ Bankruptcy Charge-offs** – The total Unpaid Principal Balance for the segment being reported that was charged off due to bankruptcy as of month-end. Report principal charge-offs only, not interest and fees. For the delinquency status segmentation, categorize charge-offs by delinquency status at charge-off.
9. **\$ Recoveries** – The total dollar amount of any balance recovery collected during the month from previously charged-off loans for the segment being reported as of month-end. For the delinquency status segmentation, categorize recoveries by delinquency status at charge-off. Recoveries should be reported as a positive value.
10. **\$ Net Charge-offs** – The total Unpaid Principal Balance for the segment being reported that was charged-off in the reference month, net of any recoveries in the reference month. Report principal charge-offs only, not interest and fees. Generally, *\$ Net Contractual Charge-offs* should equal [*\$ Gross Contractual Charge-offs + \$ Bankruptcy Charge-offs — \$ Recoveries*].
11. **Adjustment Factor to Reconcile \$ Gross Contractual Charge-offs to \$ Net Charge-offs** – If it is not the case that *\$ Net Charge-offs* equals [*\$ Gross Contractual Charge-offs + \$ Bankruptcy Charge-offs — \$ Recoveries*], provide the value of *\$ Net Contractual Charge-offs* minus [*\$ Gross Contractual Charge-offs + \$ Bankruptcy Charge-offs — \$ Recoveries*] in this variable. As a separate document included in the submission, provide an explanation for such a difference (for example, fraud losses are also included in your BHC's *\$ Net Charge-offs* variable). If the adjustment factor variable represents more than one factor leading to the difference, provide a separate breakout of the multiple factors.
12. **\$ Foreclosure** - The total Unpaid Principal Balance of loans in the foreclosure process. These dollars are pre-REO and should be coded as a foreclosure in the system.
13. **\$ New Foreclosure** - The total Unpaid Principal Balance of loans that entered the foreclosure process in the reporting month. These dollars are pre-REO and should be coded as a foreclosure in the system.
14. **\$ REO** - The total Unpaid Principal Balance of mortgages where the bank has obtained the title at foreclosure sale and the property is on the market and available for sale. Also include instances where the bank has obtained the title but the availability for sale is not known. All write-downs have occurred and the remaining balance is transferred to REO. These loans have not been sold in REO at month end.
15. **\$ New REO** - The total Unpaid Principal Balance of foreclosed loans where the institution has bought back the property in auction in the reporting month. All write-downs have occurred and the remaining

balance is transferred to REO. These are new REO loans for the month and could have been sold in REO at month end.

C. Snapshot Metrics

For each of the segments described above in Table A and starting only in the most recent reporting month, report information on the following metrics for each portfolio segment.

1. **# Accounts That Were 60+ DPD in Last 12 Months** – The total number of accounts in the reporting segment as of month-end that were 60 or more days past due at any given time in the past twelve months ending in the reference month.
2. **# Accounts Ever Modified** – The number of accounts in the segment being reported that have ever been modified.
3. **\$ Accounts Ever Modified** – The Unpaid Principal Balance associated with accounts in the segment being reported that have ever been modified.
4. **# Loans Intended for Sale** – The number of accounts in the segment being reported that are intended for sale rather than to be held for investment. The accounts may be intended for sale to GSEs, to private investors, or as part of a bulk asset sale.
5. **\$ Loans Intended for Sale** – The Unpaid Principal Balance associated with accounts in the segment being reported that are intended for sale rather than to be held for investment. The accounts may be intended for sale to GSEs, to private investors, or as part of a bulk asset sale.
6. **\$ Interim Charge-offs** – The total Unpaid Principal Balance that has been charged-off on loans in this segment through the reporting-month. Interim charge-offs include all cumulative partial charge-offs/write-downs for loan that have not been fully charged-off or otherwise liquidated.

D. Excluded Accounts

Report in Table D all loans excluded from Tables B and C because of a government guarantee or because original FICO score and/or original LTV were unable to be reported. Report loans only for the most recent reporting month and only on an aggregate basis (do not break into multiple segments).

1. **# Accounts Missing LTV only** – The number of accounts for which original LTV cannot be reported. Exclude loans where original FICO score is also missing.
2. **\$ Accounts Missing LTV only** – The Unpaid Principal Balance of accounts for which original LTV cannot be reported. Exclude loans where original FICO score is also missing.
3. **# Accounts Missing FICO Score only** – The number of accounts for which original FICO score cannot be reported. Exclude loans where original LTV is also missing.
4. **\$ Accounts Missing FICO Score only** – The Unpaid Principal Balance of accounts for which original FICO Score cannot be reported. Exclude loans where original LTV is also missing.

FR Y-14Q: Retail HELOAN Second Lien Schedule Instructions

5. **# Accounts Missing LTV and FICO Score** – The number of accounts for which original LTV and original FICO Score cannot be reported.
6. **\$ Accounts Missing LTV and FICO Score** – The Unpaid Principal Balance of accounts for which original LTV and original FICO Score cannot be reported.
