

**Children with Special Needs
Need the Flu Shot**

The image shows the logo for the Centers for Disease Control and Prevention (CDC). The letters "CDC" are rendered in a white, serif font and are centered within a dark blue rectangular box. This box is set against a larger, lighter blue background. The dark blue box has a pattern of thin, white diagonal lines running from the top-left to the bottom-right.

CDC

THE FACTS.

A photograph of a family of three sitting on a brown couch. A woman in a blue long-sleeved shirt is on the left, gesturing with her hands as if explaining something. A young boy in a dark blue t-shirt is in the middle, looking towards the woman. A man in a light grey t-shirt is on the right, leaning in and looking at the boy. The background is a bright, indoor setting with a window and some plants.

Children with special needs
who get the flu
are at higher risk
of hospitalization
and death

Children at higher risk
include children with

- asthma
- cerebral palsy
- intellectual disabilities

**Children with special needs
should get the flu shot**

not enough are getting it,
despite increased risk of problems.

What you can do!

If you care for a child with special needs, recommend they be vaccinated against the flu!

**And you should be vaccinated
against the flu too!**

A doctor in a white coat and stethoscope is talking to a man and a woman in a clinical setting. The doctor is on the right, and the man and woman are on the left. The doctor is holding a clipboard and looking at the man. The man and woman are looking at each other. There are some medical supplies on the table in front of them.
