The summary below describes the nature of the information collection requirements (ICRs) and the expected burden being submitted for clearance by OMB as required by the PRA.

Title: Identification of Cars Moved in Accordance with Order 13528.

OMB Control Number: 2130-0506.

Type of Request: Extension without change of a currently approved collection.

Affected Public: Businesses.

Abstract: This collection of information identifies a freight car being moved within the scope of Order 13528 (now codified at under 49 CFR 232.3). Otherwise, an exception will be taken, and the car will be set out of the train and not delivered. The information that must be recorded is specified at 49 CFR 232.3(d)(3), which requires that a car be properly identified by a card attached to each side of the car and signed stating that such movement is being made under authority of the Order. Section 232.2(d)(3) does not require retaining cards or tags. When a car bearing a tag for movement under this provision arrives at its destination, the tags are simply removed. This requirement/record comes into play only when a railroad finds it necessary to move equipment as specified above. FRA estimates that approximately 400 cars per year are moved under this Order.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 2127–New.

Title: The National Survey of Pedestrian and Bicyclist Attitudes, Knowledge, and Behaviors.

Form No.: NHTSA Form 1148.

Type of Review: Regular.

Respondents: Telephone interviews will be administered to a national sample of people 16 and older who have access to a residential landline and/or a personal cell phone.

Estimated Number of Respondents: 15 pre-test respondents and 9,000 survey respondents.

Estimated Time per Response: 20 minutes per interview.

Total Estimated Annual Burden Hours: 3,005 hours.

Frequency of Collection: The survey will be administered a single time.

Abstract: The National Highway Traffic Safety Administration (NHTSA)

proposes to collect information from the public to ascertain the scope and magnitude of bicycle and pedestrian activity and the public's behavior and attitudes regarding bicycling and walking. A national telephone survey will be administered to 9,000 randomly selected respondents drawn from all 50 States and the District of Columbia. The national survey will be preceded by a pretest administered to 15 respondents. The survey will ask about the characteristics of bicycling and walking trips, conspicuity, community design for bicycling and walking, bicycle helmet use, and general opinions about bicycling and walking. Interview length will average 20 minutes. NHTSA will use the findings from this proposed collection of information to assist States, localities, and communities in developing and refining bicycling and walking safety programs.

In conducting the proposed telephone interviews, the interviewers would use computer-assisted telephone interviewing to reduce interview length and minimize recording errors. No personally identifiable information will be collected during the telephone interviews.
