

impacts and benefits of implementing the high-speed train in the more geographically limited area between Merced and Fresno, and is based on more detailed project planning and engineering. This Draft EIR/EIS analysis builds on the earlier decisions and program EIR/EISs, and provides more site-specific and detailed analysis.

The Authority plans to complete the California HST System in two phases. Phase 1 will connect San Francisco to Los Angeles/Anaheim via the Pacheco Pass and the Central Valley with a mandated express travel time of 2 hours and 40 minutes or less. Phase 2 will connect the Central Valley to the state's capital, Sacramento, and will extend the system from Los Angeles to San Diego. This Project is for one section in Phase 1 and is receiving funding from FRA for design and environmental review as well as for construction of an initial Section in the Central Valley.

The American Recovery and Reinvestment Act of 2009 (Recovery Act), enacted February 17, 2009, contained \$8 billion to fund high-speed and intercity passenger rail (HSIPR) projects. In response to the Recovery Act funding, FRA developed and began implementation of the HSIPR Program to fund projects to improve existing intercity passenger rail service and to develop new high speed intercity passenger rail corridors. FRA's HSIPR Program also received an additional \$2.1 billion from the Transportation, Housing, and Urban Development and Related Agencies Appropriations Act of 2010. The California High-Speed Rail Authority applied for and was selected to receive over \$3.5 billion in HSIPR funds from FRA to complete preliminary engineering and NEPA reviews, and associated documentation for seven sections comprising the Phase 1 California HST System and to construct an initial Central Valley Section from Madera County to Bakersfield (Kern County), California. Completion of the environmental review process marked by issuance of a Record of Decision (ROD) by FRA is a prerequisite for any construction related federal funding or approvals from FRA.

The approximately 65-mile-long Merced to Fresno Section is an essential part of the statewide HST System. The Merced to Fresno Section is the location of the connection between the Bay Area and Sacramento branches of the HST System; it will provide Merced and Fresno access to a new transportation mode and will contribute to increased mobility throughout California. This Section will connect the central San Joaquin Valley region to the remainder of the HST System via Merced County,

Madera County, and the northern part of the city of Fresno.

This Draft EIR/EIS has been prepared by the FRA and the Authority consistent with the provisions of Section 102(2)(c) of the National Environmental Policy Act (NEPA) of 1969 (42 U.S.C. 4321 *et seq.*), the Counsel of Environmental Quality (CEQ) regulations implementing NEPA (40 CFR parts 1500 *et seq.*), FRA's Procedures for Considering Environmental Impacts (64 FR 28545 (May 26, 1999)), and in conformity with the California Environmental Quality Act (CEQA) (California Public Resources Code Section 21000 *et seq.*), and the CEQA Guidelines (California Code of Regulations, Title 14, Section 15000 *et seq.*).

The Draft EIR/EIS is available online at FRA's Web site: <http://www.fra.dot.gov> and the Authority's Web site: <http://www.cahighspeedrail.ca.gov>. The Draft EIR/EIS is also available for viewing at the following locations near the planned rail system:
