U.S. ELECTION ASSISTANCE COMMISSION
2008 Election Administration & Voting Survey

The ongoing process of improving America's election systems relies in part on having accurate data about the way Americans cast their ballots. In 2002, Congress chartered the U.S. Election Assistance Commission to collect information on the state of American elections and make it widely available to policy makers, advocates, scholars, journalists and the general public. Since 2004, the Commission has sponsored an Election Day Survey as its primary tool for fulfilling that mission. We are pleased to present the 2008 Election Day Survey, and we ask for your help in making it the most complete and accurate survey in its history.

The questions below ask for information about ballots cast; voter registration; overseas and military voting; Election Day activities; voting technology; and other important issues. Many of these questions are mandated by the Help America Vote Act and other federal laws, while other questions were included at the request of the research community or policy makers. The EAC recognizes the burden that asking for this data places on state and local election officials, and we have worked to minimize that burden as much as possible.

In advance, we thank you for your cooperation and look forward to answering any questions you might have.

Instructions for Completing the 2008 Election Administration & Voting Survey

1. This survey collects information on election administration issues in local election offices (typically counties or townships) that are responsible for the administration of the November 2008 general election. As such, all data should be reported at the level of the local jurisdiction. However, if a State or Territory desires, a State or Territorial level election office may fill out any or all of the information on behalf of the local election offices under its jurisdiction.

2. Don't leave items blank - always provide an answer to the question asked using the "Data not available" or "Other" categories discussed below, if needed.

3. Use the "Data not available" box if the question asks for details that are not required by your state law or the question asks for information that is not currently collected.

4. You may find it helpful to read an entire section before answering any of the questions in that section.

5. Please attempt to record data according to the categories as they are defined in the question. If your jurisdiction uses a different data classification scheme (for instance, collects data in such a way that combines two or more categories listed in a question), you can use the space provided for "Other" to provide numbers and details on these categories. Use as many "Other" categories as you need to adequately report the relevant statistics for your jurisdiction. If you enter information into the "Other" field, please use the comments field to provide an explanation for the answer.

In the example below, the jurisdiction does not collect separate statistics on the number of duplicate and rejected registration forms, but instead has only one number that represents the total number of registration forms that are either duplicated/or rejected.

EXAMPLE:

A5. In order to evaluate the workflow of your office over the last election cycle, enter the total number of registration forms your jurisdiction received from all sources during the period from the close of registration for the November 2006 general election until the close of registration for the November 2008 general election. Include here any Election Day or Same Day registrations, if applicable. Also include any special categories of voters who may have extended deadlines, such as returning military personnel, if applicable.

A5a. Total.. 5000 ....□ Data not available

Next, divide the total number of registration application forms received (as entered in A5a) into the following categories. The amounts should sum to the total provided in A4a.

SECTION A	VOTER REGISTRATION

Roadmap to Section A:

- **A1**, **A2** and **A3** ask for information about the number of registered voters in your jurisdiction and how you calculate those statistics.
- **A4** asks for information about registration activity on days in which it was possible for a person to both register and vote on the same day.
- **A5** asks for information on all registration forms for all types of registration transactions (successful and unsuccessful) received by your office.
- **A6** asks for the sources of all registration forms (both successful and unsuccessful).
- **A7** asks for the sources of new registrations.
- **A8** asks for the sources of duplicate registrations.
- **A9** asks for the sources of invalid or rejected registrations.
- **A10** asks for information on removal notices sent under NVRA Section 8(d) 2.
- **A11** asks for the number of voters removed from the voter registration rolls and the reason for their removal.

A1. Enter the total number of persons in your jurisdiction who were registered and eligible to vote in the November 2008 general election. Include all persons eligible to vote in the election including special categories of voters with extended deadlines (such as returning military) or any person who may have been able to register and vote on Election Day. Do not include any persons under the age of 18 who may be registered under a "pre-registration" program.
