General Comments and IRB Actions

The subject protocol was received 11/14/2011 and reviewed using the expedited procedure in that it presents no more than minimal risk and involves "collection of data through routine, noninvasive procedures" (criterion # 4), "research that uses previously collected materials" (criterion #5) and "research that uses interview, program evaluation, human factors, or quality assurance methods" (criterion #7) as provided for in 45CFR46.110. Your request for a waiver of documentation of informed consent is granted per 45CFR46.117 (c) (2) in "(2) That the research presents no more than minimal risk of harm to subjects and involves no procedures for which written consent is normally required outside of the research context." This protocol is approved for one year (renewal date 12/12/2012). However, if you make any substantive changes, or any adverse reactions occur in any study participants, please notify me immediately.

Protocol Issues – None.

Consent Form Issues – None.

Addenda Issues (Scripts, questionnaires, brochures, etc.) – None.
