

Request for Approval under the “Generic Clearance for the Collection of Routine Customer Feedback” (OMB Control Number: 1601-0014)

TITLE OF INFORMATION COLLECTION:

PURPOSE:

DHS seeks to develop a **research-supported** cyber outreach campaign with compelling, targeted messages that raise awareness of cybersecurity issues and educate the public on DHS’ role in protecting the public’s safety, security, and privacy when online.

This research project consists of two “waves” of research, both consisting of online qualitative focus groups. **This Request for Approval is for the first online qualitative focus group.** A separate request has been completed for the second online qualitative survey. The overall results of the research will provide DHS with current research findings, tested messages, outreach components, and recommendations to develop and implement a cybersecurity outreach campaign that delivers the greatest impact.

The objectives of the online qualitative focus group include:

- Determine awareness and understanding of cybersecurity.
- Identify perceived government role in cybersecurity and educating the public about cybersecurity.
- Explore DHS’ perceived credibility as a source of cyber protection information.
- Identify potential communications strategies.
- Explore resonant broader impact/shared responsibility messages by generation.
- Identify effective and preferred communications channels with which to conduct outreach to the audiences.
- Discuss messaging techniques that would be effective.
- Explore the public’s awareness of the impact of online behavior on individuals and national security.

DESCRIPTION OF RESPONDENTS:

LMD will conduct 20 (one for each generational segment in each geographic area) online focus groups using a consumer panel representative of each age group and geographic area, with a total of approximately 160-200 participants across all focus groups. Participants may have experienced cybersecurity messages from DHS in the past or may experience them in the future.
