Information Collection Requirement

1652-0003; Security Programs for Aircraft Operators, 49 CFR part 1544.

The information collected is used to determine compliance with 49 CFR part 1544 and to ensure passenger safety by monitoring aircraft operator security procedures. TSA is seeking to renew its OMB control number, 1652-0003, Aircraft Operator Security. TSA has implemented aircraft operator security standards at 49 CFR part 1544 to require each aircraft operator to which this part applies to adopt and carry out a security program. These TSA-approved security programs establish procedures that aircraft operators must carry out to protect persons and property traveling on flights provided by the aircraft operator against acts of criminal violence, aircraft piracy, and the introduction of explosives, incendiaries, or weapons aboard an aircraft.

This information collection is mandatory for aircraft operators. As part of their security programs, affected aircraft operators are required to maintain and update, as necessary, records of compliance with the security program provisions set forth in 49 CFR part 1544. This regulation also requires affected aircraft operators to submit security program amendments to TSA when applicable and to make their

security programs and associated records available for inspection and copying by TSA to ensure transportation security and regulatory compliance.

The information requested of aircraft operators has increased due to the security measures mandated by the Federal Government since September 11, 2001. The information TSA now collects includes identifying information on aircraft operators' flight crews, passengers and cargo. Specifically, TSA requires aircraft operators to submit the following information: (1) A master crew list of all flight and cabin crew members flying to and from the United States; (2) the flight crew list on a flight-by-flight basis; (3) passenger information on a flight-by-flight basis; (4) total amount of cargo screened; and (5) total amount of cargo screened at 100%. Aircraft operators may provide the information electronically or manually. Under this regulation, aircraft operators must ensure that flight crew members and employees with unescorted access authority to a Security Identification Display Area (SIDA) or who perform screening, checked baggage, or cargo functions submit to and receive a criminal history records check (CHRC). As part of the CHRC process, the individual must provide identifying information, including fingerprints. Additionally, aircraft operators must maintain these records, and records associated with compliance with Security Directives, and make them available to TSA for inspection and copying upon request.

TSA estimates that there will be approximately 800 respondents to the information requirements described above, requiring approximately 1,841,130 hours per year to process.

Issued in Arlington, Virginia, on January 20, 2012.

Paperwork Reduction Officer, Office of Information Technology.
