

**Justification for Non-Substantive Change for**  
**0596-0182 “Qualified Products List for Wildland Fire Chemicals”**  
**February 2012**

Due to a clerical error in version control, outdated versions of forms FS-5100-33 thru FS-5100-39 were submitted with the latest Information Collection renewal request. This error was not discovered until after the Notice of Action approving this Information Collection Request was received by Forest Service.

The changes made to the forms are of a minor housekeeping or clarification nature, designed to aid the respondent by clarifying the directions and reformatting the forms to make them easier to read.

The changes have not affected or changed the information collected or burden hours stated in the Supporting Statement. Such changes include: Updating the burden hours estimate in the burden statements to match those estimated in the approved Supporting Statement; to reduce confusion, changed the name of the forms from “Table 1, 2” to “Part 1, 2”; clarifying the term Submitting “Co.” to “Company”; adding expanded instructions to make them more clear for the convenience of the respondent; changing the formatting to make the form easier to read.

All other aspects of the approved submission remain the same.
