Pediatric Liver Transplant Recipient Registration Worksheet

FORM APPROVED: O.M.B. NO. 0915-0157 Expiration Date: 12/31/2011 Note: These worksheets are provided to function as a guide to what data will be required in the online TIEDI® application. Currently in the worksheet, a red asterisk is displayed by fields that are required, independent of what other data may be provided. Based on data provided through the online TIEDI® application, additional fields that are dependent on responses provided in these required fields may become required as well. However, since those fields are not required in every case, they are not marked with a red asterisk.

Surgical Procedure:	ō	ORTHOTOPIC
	~	HETEROTOPIC

Procedure Type:	 Whole Liver Partial Liver, remainder not Tx or Living Transplant Split Liver Whole Liver with Pancreas (Technical Reasons) Partial Liver with Pancreas (Technical Reasons) Split Liver with Pancreas (Technical Reasons)
Split Type:	
Preservation Information:	
Warm Ischemia Time (include anastomotic time):	min ST=
Total Cold Ischemia Time (if pumped, include pump time):	hrs ST=
Risk Factors:	
Did Patient receive 5 or more units of packed red blood cells within 48 hours prior to transplantation due to spontaneous portal hypertensive bleeding:	
Spontaneous Bacterial Peritonitis:	
Previous Abdominal Surgery: *	
Portal Vein Thrombosis: *	C YES C NO UNK
Transjugular Intrahepatic Portacaval Stint Shunt: *	
Incidental Tumor found at time of Transplant:	
If yes, specify tumor type:	 Hepatocellular Adenoma Hemangioma Hemangioendothelioma Angiomyolipoma

	O Bile Duct Cystadenocarcinoma
	Cholangiocarcinoma
	C Hepatocellular Carcinoma
	C Hepatoblastoma
	O Angiosarcoma
	Other Primary Liver Tumor, Specify
Specify:	
Pathology Conf. Liver Diag. of Hospital Discharge: st	
Specify:	
Graft Status: *	C Functioning C Failed
If death is indicated for the recipient, and the death was a	result of some other factor unrelated to graft failure, select Functioning.
Date of Graft Failure:	
Causes of graft failure:	
Primary Graft Failure	
Vascular Thrombosis	
Hepatic arterial thrombosis:	
Hepatic outflow obstruction:	
Portal vein thrombosis:	O YES O NO UNK
Biliary Tract Complication	
Hepatitis: DeNovo	
Hepatitis: Recurrent	
Recurrent Disease (non-Hepatitis)	

Acute Rejection	
Infection	
Other, Specify:	
Discharge Lab Date:	
Total Bilirubin:	mg/dl ST=
SGPT/ALT:	U/L ST=
Serum Albumin:	g/dl ST=
Serum Creatinine:	mg/dl ST=
INR:	ST=
Did patient have any acute rejection episodes between transplant and discharge: *	 Yes, at least one episode treated with anti-rejection agent Yes, none treated with additional anti-rejection agent No Biopsy not done Yes, rejection confirmed Yes, rejection not confirmed
Biological or Anti-viral Therapy:	YES NO Unknown/Cannot disclose
If Yes, check all that apply:	 Acyclovir (Zovirax) Cytogam (CMV) Gamimune Gammagard

		Ganciclovir (Cytovene)
		Valgancyclovir (Valcyte)
		HBIG (Hepatitis B Immune Globulin)
		Flu Vaccine (Influenza Virus)
		Lamivudine (Epivir) (for treatment of Hepatitis B)
		Other, Specify
		Valacyclovir (Valtrex)
Specify:		
Specify:		
Other therapies:	0	YES NO
		Photopheresis
If Yes, check all that apply:		Plasmapheresis
		Total Lymphoid Irradiation (TLI)
Are any medications given currently for maintenance or anti-rejection: $lpha$	0	YES NO
Did the patient participate in any clinical research protocol for immunosuppressive medications:	0	YES NO
If Yes, Specify:		
L View Immunosuppressive Medications		

Definitions Of Immunosuppressive Medications

For each of the immunosuppressant medications listed, check **Previous Maintenance (Prev Maint)**, **Current Maintenance (Curr Maint)** or **Anti**rejection (AR) to indicate all medications that were prescribed for the recipient during this follow-up period, and for what reason. If a medication was not given, leave the associated box(es) blank.

Previous Maintenance (Prev Maint) includes all immunosuppressive medications given during the report period, which covers the period from the last clinic visit to the current clinic visit, for varying periods of time which may be either long-term or intermediate term with a tapering of the dosage until the drug is either eliminated or replaced by another long-term maintenance drug (example: Prednisone, Cyclosporine, Tacrolimus, Mycophenolate Mofetil, Azathioprine, or Rapamycin). This does not include any immunosuppressive medications given to treat rejection episodes.

Current Maintenance (Curr Maint) includes all immunosuppressive medications given at the current clinic visit to begin in the next report for varying periods of time which may be either long-term or intermediate term with a tapering of the dosage until the drug is either eliminated or replaced by another long-term maintenance drug (example: Prednisone, Cyclosporine, Tacrolimus, Mycophenolate Mofetil, Azathioprine, or Rapamycin). This does not include any immunosuppressive medications given to treat rejection episodes.

Anti-rejection (AR) immunosuppression includes all immunosuppressive medications given for the purpose of treating an acute rejection episode since the last clinic visit (example: Methylprednisolone, Atgam, OKT3, or Thymoglobulin). When switching maintenance drugs (example: from Tacrolimus to Cyclosporine; or from Mycophenolate Mofetil to Azathioprine) because of rejection, the drugs <u>should not</u> be listed under AR immunosuppression.

Note: The Anti-rejection field refers to any anti-rejection medications since the last clinic visit, not just at the time of the current clinic visit.

If an immunosuppressive medication other than those listed is being administered (e.g., new monoclonal antibodies), select Previous Maint, or Current Maint, or AR next to Other Immunosuppressive Medication field, and enter the full name of the medication in the space provided. <u>Do not list non-immunosuppressive medications</u>.

For each of the immunosuppressive medications listed, select **Ind** (Induction), **Maint** (Maintenance) or **AR** (Anti-rejection) to indicate all medications that were prescribed for the recipient during the initial transplant hospitalization period, and for what reason. If a medication was not given, leave the associated box(es) blank.

Induction (Ind) immunosuppression includes all medications given for a short finite period in the perioperative period for the purpose of preventing acute rejection. Though the drugs may be continued after discharge for the first 30 days after transplant, it <u>will not</u> be used long-term for immunosuppressive maintenance. Induction agents are usually polyclonal, monoclonal, or IL-2 receptor antibodies (example: Methylprednisolone, Atgam, Thymoglobulin, OKT3, Simulect, or Zenapax). Some of these drugs might be used for another finite period for rejection therapy and would be recorded as rejection therapy if used for this reason. For each induction medication indicated, write the <u>total number of days the drug was actually</u> <u>administered</u> in the space provided. For example, if Simulect or Zenapax was given in 2 doses a week apart, then the total number of days would be 2, even if the second dose was given after the patient was discharged.

Maintenance (Maint) includes all immunosuppressive medications given before, during or after transplant for varying periods of time which may be either long-term or intermediate term with a tapering of the dosage until the drug is either eliminated or replaced by another long-term maintenance drug (example: Prednisone, Cyclosporine, Tacrolimus, Mycophenolate Mofetil, Azathioprine, or Rapamycin). This does not include any immunosuppressive medications given to treat rejection episodes, or for induction.

Anti-rejection (AR) immunosuppression includes all immunosuppressive medications given for the purpose of treating an acute rejection episode during the initial post-transplant period or during a specific follow-up period, usually up to 30 days after the diagnosis of acute rejection (example: Methylprednisolone, Atgarn, OKT3, or Thymoglobulin). When switching maintenance drugs (example: from Tacrolimus to Cyclosporine; or from Mycophenolate Mofetil to Azathioprine) because of rejection, the drugs <u>should not</u> be listed under AR immunosuppression, but <u>should be</u> listed under maintenance immunosuppression.

If an immunosuppressive medication other than those listed is being administered (e.g., new monoclonal antibodies), select Ind, Maint, or AR next to Other Immunosuppressive Medication field, and enter the full name of the medication in the space provided. <u>Do not list non-immunosuppressive</u> <u>medications.</u>
