LOOPOUT

CONFIRM THAT ALL HOUSEHOLD MEMBERS HAVE BEEN ROSTERED BEFORE CONTINUING, SAY:

**Just to confirm, I have listed [FILL NUMBER] adults. Is this the correct number of adults over 18 living in your household?"**

1. YES [GO TO SPHONE1]

2. NO [GO TO ADDMEM]

77. DON'T KNOW

99. REFUSE

---

ADDMEM

**How many adults 18 years old and older live in your household?**

|\_\_|

99. REFUSE

Subtract the value given at ADDMEM from NUM\_HH. The result is a positive integer, the remainder will determine how many extra HH members to ask about when CATI returns to the household roster variables. When returning to the household roster variables to add new HH members, CATI should begin at the first blank roster number for name, age, span, race and haitian. When adding new HH members X = the last ordinal number used in the original loop +1. IF the result is a negative integer (i.e., they indicate that they rostered too many people), display a grid that lists the persons currently rostered.

If informant wants to delete a HH member from the roster, we should display a grid that shows the roster and allows interviewer to select the HH member to remove from the roster. If a member is to be removed from the roster, set flag IGNORE to indicate which roster position should be ignored during the respondent selection process and change ELIGIBILITY to 0. The data in the roster positions that are being ignored should not be erased.
