DESIGN NOTES

The instructions for the report display are based on the last time DM4 - DMSERVIC was asked for this Discount Membership plan in a previous round.

DM4 - DMSERVIC is asked when:

- 1) The Discount Membership plan is new in the current round.
- 2) The SP had the Discount Membership plan during the previous round and still had the Discount Membership plan anytime in the current round, and if it's a fall round.

Because of these rules, the last time DM4 - DMSERVIC was asked for a given Discount Membership plan could be stored on any previous round DMRO.

All previous round DMRO's will be loaded in the database. Excluding the current round DMRO, check each DMRO, starting with the most recent previous round DMRO, until DMRO.DMSERVIC ^= empty. The most recent DMRO where DMRO.DMSERVIC ^= empty is where the last time DM4 - DMSERVIC was collected.
