SUPPLEMENTARY INFORMATION:

Title: 30 CFR 250, Subpart J, Pipelines and Pipeline Rights-of-Way.

Form: BSEE-0149.

OMB Control Number: 1014-0016.

Abstract: The Outer Continental Shelf (OCS) Lands Act, as amended (43 U.S.C. 1331 *et seq.* and 43 U.S.C. 1801 *et seq.*), authorizes the Secretary of the Interior to prescribe rules and regulations necessary for the administration of the leasing provisions of the Act related to mineral resources on the OCS. Such rules and regulations will apply to all operations conducted under a lease, right-of-way (ROW), or a right-of-use

and easement. Section 1334(e) authorizes the Secretary to grant ROWs through the submerged lands of the OCS for pipelines "* * * for the transportation of oil, natural gas, sulphur, or other minerals, or under such regulations and upon such conditions as may be prescribed by the Secretary, * * * including (as provided in section 1347(b) of this title) assuring maximum environmental protection by utilization of the best available and safest technologies, including the safest practices for pipeline burial * * *."

The Independent Offices Appropriations Act (31 U.S.C. 9701), the Omnibus Appropriations Bill (Pub. L. 104-133, 110 Stat. 1321, April 26, 1996), and OMB Circular A-25, authorize Federal agencies to recover the full cost of services that confer special benefits. This authority and responsibility are among those delegated to BSEE. BSEE regulations specify cost recovery service fees for pipeline and assignment applications.

This information collection (IC) request addresses the regulations under 30 CFR 250, subpart J, on pipelines and pipeline ROWs and is considered a revision. Between the initial 60-day FR notice and now, BSEE requested and obtained OMB approval via a Notice of Action (12/12/2011) to transfer 1010-0050 to 1014-0016. This transfer was a result of the Bureau of Ocean Energy Management, Regulations and Enforcement splitting into two bureaus and some specific subpart J regulatory requirements going to both bureaus. Therefore, the program change is due to that final rulemaking (76 FR 64432) where the requirements pertaining to bonding (Form BOEM-2030; § 250.1011) have been removed from BSEE regulations and are now located in the Bureau of Ocean Energy Management regulations (30 CFR 550.1011). This collection also covers the related Notices to Lessees and Operators (NTLs) that BSEE issues to clarify and provide additional guidance on some aspects of the regulations.

Regulations at 30 CFR part 250, subpart J, implement these statutory requirements. We use the information to ensure those activities are performed in a safe manner. BSEE needs information concerning the proposed pipeline and safety equipment, inspections and tests, and natural and manmade hazards near the proposed pipeline route. BSEE uses the information to review pipeline designs prior to approving an application for an ROW or lease term pipeline to ensure that the pipeline, as constructed, will provide for safe transportation of oil and gas and other minerals through the submerged lands

of the OCS. We review proposed pipeline routes to ensure that the pipeline would not conflict with any State requirements or unduly interfere with other OCS activities. BSEE reviews proposals for taking pipeline safety equipment out of service to ensure alternate measures are used that will properly provide for the safety of the pipeline and associated facilities (platform, etc.). We review notification of relinquishment of an ROW grant and requests to abandon pipelines to ensure that all legal obligations are met and pipelines are properly abandoned. BSEE monitors the records concerning pipeline inspections and tests to ensure safety of operations and protection of the environment and to schedule their workload to permit witnessing and inspecting operations. Information is also necessary to determine the point at which the Department of the Interior or the Department of Transportation (DOT)

has regulatory responsibility for a pipeline and to be informed of the identified operator if not the same as the ROW holder.

The following form is also submitted to BSEE under subpart J:

BSEE-0149—Assignment of Federal OCS Pipeline Right-of-Way Grant: BSEE uses the information to track the ownership of pipeline ROWs; as well as use the information to update the corporate database that is used to determine what leases are available for a Lease Sale and the ownership of all OCS leases.

We will protect information from respondents considered proprietary under the Freedom of Information Act (5 U.S.C. 552) and its implementing regulations (43 CFR part 2); also under regulations at 30 CFR 250.197, "Data and information to be made available to the public or for limited inspection," and 30 CFR 252, "Outer Continental

Shelf (OCS) Oil and Gas Information Program."

No items of a sensitive nature are collected. Responses are mandatory or are required to obtain or retain a benefit.

Frequency: On occasion, annual.

Description of Respondents: Potential respondents include lessees, operators, and holders of pipeline ROWs.

Estimated Reporting and Recordkeeping Hour Burden: The estimated annual hour burden for this information collection is a total of 55,072 hours. The following chart details the individual components and estimated hour burdens. In calculating the burdens, we assumed that respondents perform certain requirements in the normal course of their activities. We consider these to be usual and customary and took that into account in estimating the burden.

A permit granted by us under section 10(a)(1)(A) of the Act authorizes the permittee to conduct activities (including take or interstate commerce) with respect to U.S. endangered or threatened species for scientific purposes or enhancement of propagation or survival. Our regulations implementing section 10(a)(1)(A) of the Act for these permits are found at 50 CFR 17.22 for endangered wildlife species, 50 CFR 17.32 for threatened wildlife species, 50 CFR 17.62 for endangered plant species, and 50 CFR 17.72 for threatened plant species.
