NAICS INDUSTRY DEFINITION

This U.S. industry comprises establishments primarily engaged in (1) slaughtering poultry and small game and/or (2) preparing processing poultry and small game meat and meat byproducts.

EXCLUDED FROM THIS INDUSTRY ARE THE FOLLOWING:

<u>NAICS</u>	<u>TITLE</u>	<u>PRODUCTS</u>
112310	Chicken Egg Production	Raising chickens for chicken egg production
112320	Broilers & Other Meat Type Chicken Production	Raising broilers, fryers, roasters, and other meat type chickens
112330	Turkey Production	Raising turkeys for meat or turkey egg production
112340	Poultry Hatcheries	Hatching of poultry of any kind
112390	Other Poultry Production	Raising poultry except chicken and turkeys, incl. ducks, emu, geese, ostrich, pheasants, quail, pigeons (squab)
311119	Other Animal Food Manufacturing	Prepared animal feeds for chickens and turkeys
311412	Frozen Specialty Food Manufacturing	Frozen TV dinners, entrees, and side dishes containing poultry
311611	Animal (except Poultry) Slaughtering	Slaughter of cattle, hogs, sheep, lambs, and calves and the production of meat products from animals slaughtered in the same establishment
311612	Meat Processed from Carcasses	Meat products manufactured from purchased carcasses
311613	Rendering and Meat Byproduct Processing	Rendering of animal fat, bones, and meat scraps
311999	All Other Miscellaneous Food Manufacturing	Eggs: canned, dehydrated, desiccated, frozen and processed, egg substitutes made from eggs, egg albumin, breaking of eggs
424420	Packaged Frozen Food Merchant Wholesalers	Merchant wholesale distribution of packaged frozen poultry
424440	Poultry and Poultry Product Merchant Wholesalers	Merchant wholesale distribution of poultry and/or poultry products (except canned and packaged frozen)

01 PRODUCT

YOUNG CHICKEN (USUALLY UNDER 20 WEEKS OF AGE), WHOLE OR PARTS

- 001 Wet ice packed broiler or fryer shipped in bulk
- 002 Dry ice packed broiler or fryer shipped in bulk
- 003 Chilled tray packed broiler or fryer (consumer packaged)

OTHER BROILER AND FRYER PACKAGING INCLUDING FROZEN (ANY SHIPMENT SIZE)

- 004 Vacuum packed broiler or fryer
- 005 Individually quick frozen broiler or fryer
- 006 Other broiler and fryer packaging types (*specify*)

ROASTERS AND CAPONS INCLUDING FROZEN

- 007 Roaster
- 008 Capon

HEN OR FOWL (INCLUDING FROZEN), WHOLE OR PARTS (excludes Cornish game hens)

- 009 Egg producing hen (*spent hens*)
- 010 Egg producing fowl
- 011 Breeder hen
- 012 Breeder fowl

02 TYPE OF PRODUCTION

001 _____

COMMENTS

DEFINITIONS

BREAST QUARTER – Half a breast, a wing, and a portion of the back.

BROILER/FRYER (WOG) – Young chickens of either sex (typically male) which are slaughtered within 6 to 10 weeks of age after their slaughter weight has reached between 1.5 to 3.5 pounds. Broilers are usually prepared by broiling beneath direct heat, flame or over glowing coals.

BROTH – Liquids resulting from cooking poultry in water. Examples are chicken or turkey broth.

CAPON – Male chickens that are castrated at about 1 ¾ pounds and then allowed to grow to a desired weight before being slaughtered. Caponizing renders male chickens capable of quicker growth (lowering feed costs) and results in superior flesh quality. Capons are typically used in the home as roasting chickens.

CHICK – Newly hatched chicken of either sex.

CHILL PACKED CHICKEN – Chicken that is typically packaged for retail sale and is kept chilled (not frozen through) by mechanical refrigeration between the packing plant to the store counter. The chicken is kept chilled between 26 to 28 degrees Fahrenheit on the outside which allows the inside of the chicken to be between 32 and 43 degrees Fahrenheit making thawing and preparation easier for consumers, as the chicken is not frozen through.

COCKEREL – Any male chicken less than a year old. These could be either broiler/fryers or roasters as desired. Most are slaughtered within 6 to 10 weeks.

CORNISH GAME HEN – Young, immature chicken derived from an English breed of chicken raised chiefly for crossing with other breeds to produce roasters. Usually processed at five to six weeks of age and not weighing more than two pounds ready-to-cook weight. Not to be confused with egg producing hens (spent hens).

CRYOGENIC VACUUM PACKED – Carbon dioxide (CO₂) gas or liquid nitrogen is used to lower the temperature of the fowl, the fowl is then placed into a plastic bag which has the air vacuumed from it and then sealed. This is different than DRY ICE PACKED (carbon dioxide packed) which uses solidified blocks of CO₂ as the refrigerant.

CUTLET - Slices from a whole muscle tissue. Turkey breast cutlets are an example.

DRUMETTE – The meaty upper part of a wing (not a whole wing). They begin as whole wings, which are then cut at the joint.

FREE RANGE POULTRY – A designation that means the bird was allowed to roam free out doors, which may have a positive affect on the flavor of the poultry.

FRESH CHICKEN – The word fresh on the label of a chicken product indicates that the product has never been chilled or cooled below 26 degrees Fahrenheit.

FROZEN SELF BASTING – The poultry is injected with ingredients such as juices, oils, and seasonings before being frozen. When roasted the extra ingredients keep the meat moist and tender and provide extra flavor.

FROZEN TURKEY – Turkey that must be cooled to a temperature of 0 degrees Fahrenheit or colder even though turkey freezes at 26 degrees Fahrenheit. **HARD CHILLED TURKEY** is turkey which has been frozen to between 0 degrees and 26 degrees Fahrenheit. **FRESH TURKEY** is turkey which has never been allowed to be cooled to a temperature lower than 26 degrees Fahrenheit.

GIBLETS – The edible viscera of a fowl. These would include things like the heart, liver, gizzard, i.e. internal organs of a fowl often cooked separately.

GRADE (QUALITY) – These are designations assigned by the USDA to poultry meat. Grades A, B, and C are examples. The grades are based on appearance (lack of defects, i.e. damaged flesh or missing parts) of the product primarily. Grade A is by far the most common as lower grades are less likely to be sold.

HEN – Female chickens that have reached sexual maturity and are most often used as egg layers. They are typically more than one year old. Female chickens must mature for between four to six months from birth, before being able to lay eggs. They are then productive for another 12 to 18 months of egg laying before being slaughtered. Hens may continue to lay eggs for as long as 4 to 5 years but after the first year the rate is considerably reduced and the usual practice is only to keep them for about 1.5 years.

INDIVIDUALLY QUICK FROZEN (IQF) – Using cryogenic equipment, products are frozen so fast that the juices in the meats are not allowed to form large ice crystals and damage the flavor, juiciness, and tenderness of the meat. Both raw and cooked products may be frozen IQF.

KOSHER SLAUGHTERING - Requires ritual slaughter of the fowl/game. The live bird is bled by a specially trained rabbi. This implies no special quality of the bird - only that it is slaughtered according to religious laws.

LEG (WHOLE LEG) – A thigh and drumstick, does not include a portion of the back.

LEG QUARTER – A thigh, a drumstick and a portion of the back.

MATURE TURKEY – An old turkey of either sex (usually in excess of 15 months of age) with coarse skin and toughened flesh.

MECHANICALLY SEPARATED – A poultry food product made by mechanically separating bone from muscle tissue of carcasses.

NATURAL CHICKEN OR TURKEY – This refers to chicken or turkey which has had limiting processing and has no artificial ingredients or coloring added to the product.

ORGANIC CHICKEN OR TURKEY – This refers to chickens or turkeys that were allowed to roam free outdoors (free range) and that have been fed only organic feed free of antibiotics and growth hormones.

PULLET – Female chicken less than a year old.

RAW BONED - Boneless raw meat.

ROASTERS – Typically fully grown male fowls fed and managed for a desired optimal size and weight and then slaughtered when prime for roasting whole. They are often stuffed with dressing and made the chief food in a large family dinner.

ROOSTER – Male chickens more than one year old (also known as cocks). These are typically used as breeder stock first before eventually being slaughtered.

SQUAB – A young immature pigeon of either sex, and is extra tender meat.

STEWING CHICKEN – Typically a mature female chicken (usually more than 10 months of age) with meat less tender than that of a roaster or roasting chicken and non-flexible breastbone tip. These are usually hens whose egg laying production has fallen due to age. The chicken meat ends up in soups for example.

TENDER – Any strip of breast meat.

TENDERLOIN – Inner pectoral muscle that lies alongside the breastbone.

TOM – The male of various animals. Turkey toms is an example.

WET ICE PACKED CHICKEN – Chicken that is cooled in ice and water and shipped in usually by truck in ice shavings at between 28 and 35 degrees Fahrenheit.

WHITE AND DARK MEATS – For both chickens and turkeys, the white meat comes primarily from the breasts and wings and the dark meats come from the thighs and drumsticks (leg).

YOUNG CHICKEN – Commercially grown broiler-fryer and other young, immature birds, such as roasters and capons.

YOUNG TURKEY – Turkeys usually under 8 months of age. Turkeys are typically ready for marketing after between 18 and 22 weeks of growth.
