Question Name	N12DEGREE
Help Text	<u>Degrees:</u> An associate's degree normally requires at least 2, but less than 4 years, of full-time equivalent college work. A bachelor's degree is usually awarded by a 4-year college or university and usually requires at least 4 years of full-time, college-level work. A master's degree usually requires at least 2 years of full-time graduate-level work and may require a thesis or a practicum. A doctoral degree-research/scholarship is a Ph.D. or other doctor's degree that

requires advanced work beyond the master's level, including the preparation and defense of a dissertation based on original research, or the planning and execution of an original project demonstrating substantial artistic or scholarly achievement. Some examples of this type of degree may include Ed.D., D.M.A., D.B.A., D.Sc., D.A., or D.M., and others, as designated by the awarding institution.

A doctoral degree-professional practice is a doctor's degree that is conferred upon completion of a program providing the knowledge and skills for the recognition, credential, or license required for professional practice. The degree is awarded after a period of study such that the total time to the degree, including both pre-professional and professional preparation, equals at least six full-time equivalent academic years. Some of these degrees include: chiropractic (D.C., or D.C.M.); dentistry (D.D.S. or D.M.D.); law (L.L.B. or J.D.); medicine (M.D.); optometry (O.D.), osteopathic medicine (D.O.); pharmacy (Pharm.D.); podiatry (D.P.M., Pod.D., D.P.); or veterinary medicine (D.V.M.), and others, as designated by the awarding institution.

A doctoral degree-other is a doctor's degree that does not meet the definition of a doctor's degree-research/scholarship or a doctor's degree-professional practice.

Certificates and Diplomas:

Undergraduate certificates or diplomas usually take less than two years to complete and are usually designed to equip people with the skills needed for direct entry to employment or to earn a license such as a cosmetology license. Other examples include certificates in administrative support, computer programming, and medical records.

A post-baccalaureate certificate provides students who already hold a bachelor's degree with new or additional training in an area of specialization. Certificates typically require fewer course hours than do master's or doctoral degrees, and do not require a thesis or dissertation. Examples of this include certificates in accounting, computer science, and human resource management.

A post-master's certificate usually requires completion of 24 semester credit hours beyond the master's degree but does not meet the requirements of academic degrees at the doctoral level.

Not enrolled for a degree or certificate:

Undergraduate level classes means taking courses at the undergraduate level but not formally enrolling in a degree or certificate program of any sort.

Graduate level classes are for students who already hold an undergraduate degree or certificate and who are enrolled in graduate-level courses beyond a bachelor's degree, but who are not formally enrolled in a graduate degree program.

Question Name	N12EXPEVR
Help Text	Indicate the highest level of education that you ever expect to complete at any school. If you do not plan to pursue any education beyond what you are currently working on, enter your current degree or program. Undergraduate level courses, no undergraduate degree or certificate expected means taking courses at the undergraduate level but not expecting to formally enroll in a degree or certificate program of any sort. Undergraduate certificates or diplomas usually take less than two years to complete and are usually designed to equip people with the skills needed for direct

entry to employment or to earn a license such as a cosmetology license. Other examples include certificates in administrative support, computer programming, and medical records.

An associate's degree normally requires at least 2, but less than 4 years, of full-time equivalent college work.

A bachelor's degree is usually awarded by a 4-year college or university and usually requires at least 4 years of full-time, college-level work.

Graduate level courses, no graduate degree or certificate expected means already holding an undergraduate degree or certificate and enrolling in graduate-level courses beyond a bachelor's degree, but not expecting to formally enroll in a graduate degree program.

A post-baccalaureate certificate provides students who already hold a bachelor's degree with new or additional training in an area of specialization. Certificates typically require fewer course hours than do master's or doctoral degrees, and do not require a thesis or dissertation. Examples of this include certificates in accounting, computer science, and human resource management.

A master's degree usually requires at least 2 years of full-time graduate-level work and may require a thesis or a practicum.

A post-master's certificate usually requires completion of 24 semester credit hours beyond the master's degree but does not meet the requirements of academic degrees at the doctoral level.

A doctoral degree, research/scholarship is a Ph.D. or other doctor's degree that requires advanced work beyond the master's level, including the preparation and defense of a dissertation based on original research, or the planning and execution of an original project demonstrating substantial artistic or scholarly achievement. Some examples of this type of degree may include Ed.D., D.M.A., D.B.A., D.Sc., D.A., or D.M., and others, as designated by the awarding institution.

A professional doctoral degree is a doctor's degree that is conferred upon completion of a program providing the knowledge and skills for the recognition, credential, or license required for professional practice. The degree is awarded after a period of study such that the total time to the degree, including both pre-professional and professional preparation, equals at least six full-time equivalent academic years. Some of these degrees include: chiropractic (D.C., or D.C.M.); dentistry (D.D.S. or D.M.D.); law (L.L.B. or J.D.); medicine (M.D.); optometry (O.D.), osteopathic medicine (D.O.); pharmacy (Pharm.D.); Podiatry (D.P.M., Pod.D., D.P.); or veterinary medicine (D.V.M.), and others, as designated by the awarding institution.
